22-00707	Playing with Fire: Strange Case of Marine Processors	<p>Contributing material by BHS Graduate Wilma Alpha Subra</p> <p>Exerpt from Amazon: Playing with Fire chronicles the ongoing struggle facing Louisiana families trying to live and work against the backdrop of corrupt politicians and corporate greed. However, the story presented here is relevant wherever low-income, disenfranchised people are not included in decisions about their health and environment. This book examines the tale of Marine Shale Processors, the world's largest hazardous waste company, and the women who fought to protect their community and their children. The lesson here is that a dedicated group of people fighting for what is right can win and it serves as an example for any community that wants to determine what their own environmental future. Playing with Fire is a well-documented account that provides lessons for communities, government agencies, and corporations. It dispels the narrative that low-income communities must settle for jobs at the expense of clean air and water and politicians and demonstrates that corporations that further trample on the rights of people will ultimately pay the price.</p> <p>330 pages, publisher: Hamilton Books</p>	Artifact		Bookshelf with Local Authors

23-00093	Fire Alarm Box	Red and Silver Fire Alarm Box. This is an original Fire Call Box used in the Town of Berwick from the 1940's to the 1950's. The box was manufactured by Gamewell-FCI who has been in business since the 1850's These boxes were mounted on utility poles in the town. When a resident observed a fire they would push the button on the call box and that would trigger an alarm at the old Berwick City Hall. This would make an audible signal that the firemen would hear. The blaring signal would announce the area of the fire but not the exact location as is done today.	Artifact	Keith Barbier	On Display	Artifacts/Fire Alarm Box
