THE 2024 ANNUAL REPORT FOR

THE BOONE COUNTY HEALTH DEPARTMENT

Public Health
Prevent. Promote. Protect.

Boone County
Health Department

1204 Logan Ave., Belvidere, IL 61008 Phone (815) 544-2951 www.boonehealth.org

Our Mission

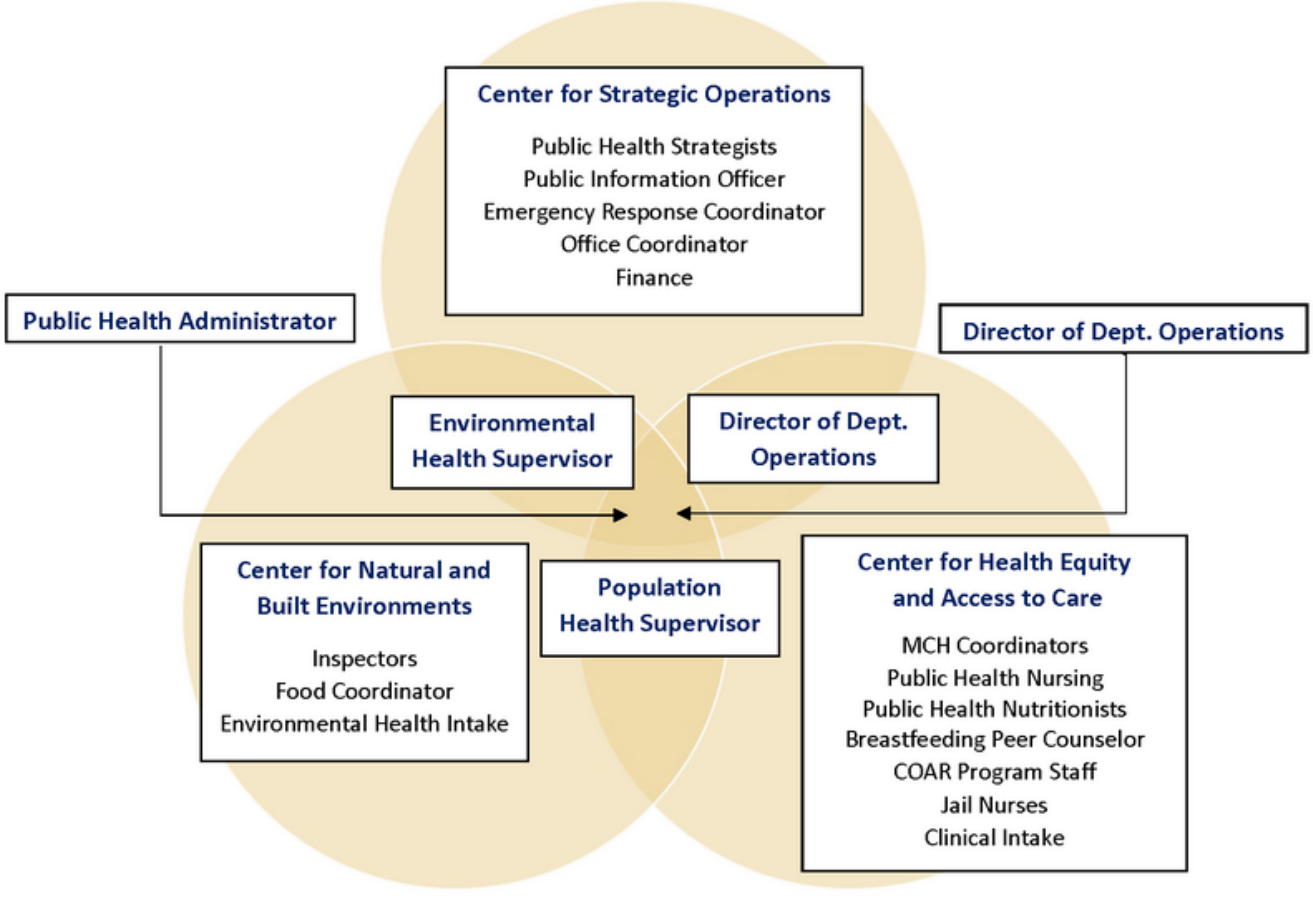

Our mission is to serve our community by preventing the spread of disease, promoting equitable wellness & protecting the public's health.

Our Vision

Our vision will guide and inspire the community to enjoy a high quality of life by:

- Redefining the role of public health delivery and advocacy
- Advancing a culture of diversity, health equity, inclusion, and justice
- Building strong community engagement and collaboration

2024 Health Department Organizational Chart

Message from your Public Health Administrator

2024 has been a year of major accomplishments for the Boone County Health Department. In August 2024, the Boone County Health Department became the 11th and smallest local health department in the state of Illinois to be Public Health Board (PHAB) Accredited. This accreditation is up for renewal every five years and requires yearly written report submissions. I want to sincerely thank our staff, the Board of Health, and all our community partners for their hard work and dedication to this process. We are all so proud of this accomplishment.

During 2024, BCHD worked diligently with our community partners to launch the 2024-2027 Illinois Project for Local Area Needs (IPLAN) action cycle. Action cycle simply means, where the rubber meets the road. This is where the real work is developed, implemented, and tracked. Our community coalitions, councils, and task forces now all coordinate regularly during monthly meetings to meet IPLAN goals and objectives together across agencies as an emerging system of care.

The Behavioral Health Task Force expanded operations by receiving two large state grants this year. We were awarded the Illinois Criminal Justice Information Authority Deflection grant for an expansion of the COAR program to include a Post Overdose Response through the implementation of a Naloxone Plus Program (NPP) leveraging partnerships with local law enforcement and substance use treatment agencies. Additionally, we received the Advocates for Human Potential (AHP) Regional Care Coordination Agency (RCCA) Community Outreach and Recovery Supports (CORS) subaward to expand the COAR program to include a mass communication campaign and the development of a peer recovery support and peer mentor team.

In 2024, our Department led the Maternal Child Health Council through three large scale community maternal child health grant applications. The Birth to Five Illinois, the WIC Community Innovation and Outreach Project (WIC CIAO), and the Illinois Department of Public Health Birth Equity grants. These grants propose further development of a provider network and coordinated an intake and referral system amongst community partners, the expansion of our peer navigator care model, and the diversification of our work with our immigrant population, LGBTQIA+ community, and reproductive health care providers. BCHD launched the new MCH Data Dashboard which is available here.

The Boone County Hunger Coalition co-facilitated a Poverty Simulation with Rock Valley College bringing more than 30 agencies to engage in an interactive activity designed educate community leaders and members of the public and to cultivate a new understanding around poverty and its contributing factors. The Hunger Coalition also received a grant of more than $11,000 to provide refrigeration units to three local pantries to enhance local food delivery systems. BCHD launched the new Food Security Dashboard which is available here.

After three years of planning and discussions with County Administration and the Boone County Board, the Health Department is part of a renovation and expansion project to the government campus where our building is housed on Logan Ave. This building project will grow our physical space by about 5,000 square feet and allow us to better deliver Behavioral and Maternal Child Health services on site. Visit rooms with enhanced technology will allow for the versatility of appointment and provider type and facilitate more telehealth opportunities. The Community multipurpose meeting space will allow our public space to be better shared with partners and community members. Ultimately the space will provide more safety mechanisms and privacy controls to transition our department into a more long-term solution for sustainable local public health.

Respectfully,
Amanda Mehl

Amanda Mehl
Public Health Administrator

Boone County Health Department Strategic Plan

Strategic Goals

Strategic Initiatives

Population Health Focus

- Completed Trauma Informed Assessment with staff, partners, and clients.
- Hosted and completed DEIJ trainings in LGBTQIA+, Disability Awareness, Immigration, and Structural Racism. BCHD partnered with all community stakeholder groups to send partner agency staff to training to promote health equity amongst partner staff and agencies.
- Completed and Published 2024-2027 IPLAN with Behavioral Health, Maternal Child Health, and Food Security as county health priorities
- Attained National Public Health (PHAB) Accreditation in August 2024 making BCHD the 11th and smallest accredited health department in Illinois.
- Completed development and training of IPLAN biannual tracking tools to all community stakeholder groups.

Communication

- Reviewed and revised BCHD's Branding Policy, Communication Policy and, Interagency Communications Policy.
- Created a first ever Customer Service Policy which includes a mechanism for customer/client complaints.
- Developed a process for regular website maintenance and a procedure to request content to be added.
- Reached 45,645 individuals on Facebook through the Partnered for Vaccine Equity (PAVE) grant communications campaign.
- Vaccine education was provided through flyers, seminars, and radio programs, both in Spanish and English.

Boone County Health Department Strategic Plan

Strategic Goals

Strategic Initiatives

Performance Management

- Applied evidence-based practices by utilizing show rate date to determine a condensed WIC on Wheels (WOW) clinic bus circuit..
- Created a new credit card reconciliation process through the Credit Card Administrative QI Project and expanded EzEMRx capabilities.
- Identified two Quality Improvement Projects for Fiscal Year 2025.
- Applied evidence-based practices by hosting a Farmers Market Wellness Fair.
- Launched the Maternal Child Health and Food Security Data Dashboards.

Funding Diversity

- Received the Birth to Five Illinois year three subcontract through the Illinois State Board of Education using the Early Childhood Block Grant.
- Awarded WIC-CIAO Round 2 grant to provide culturally appropriate services to newly arriving immigrant families. Allows BCHD and the MCH Council to coordinate government offices, social services, and Immigrant Support offices such as Illinois Welcome Centers to increase WIC supplemental nutrition program outreach, referrals, enrollment, and retention.
- Awarded the Illinois Criminal Justice Information Authority Deflection grant for an expansion of COAR to include a Post Overdose Response through the implementation of a Naloxone Plus Program (NPP) leveraging partnerships with local law enforcement and substance use treatment agencies.
- Awarded the Advocates for Human Potential (AHP) Regional Care Coordination Agency (RCCA) Community Outreach and Recovery Supports (CORS) subaward to expand the COAR program to include a mass communication campaign and the development of a peer recovery support and peer mentor team.
- Managed No Cost Extension dollars from Department of Justice to maintain COAR staffing and program operations.
- Collaborated with the Board of Health, Boone County GIS, and the Kendall County Health Department to develop plans for a using GIS Esri for Environmental and Behavioral Health electronic services and tracking.

Domain One: Monitor the health status of populations in order to identify trends and to target health resources.

- BCHD monitored seasonal influenza activity locally and then compared that to statewide and national trends. Seasonal viruses that were monitored for FY 24 included reporting of respiratory syncytial virus (RSV) and COVID-19.
- BCHD received reports on positive rapid influenza tests regularly from providers in Boone County and Daily Absenteeism Data from both District 100 and 200 students and staff who were absent with Influenza Like Illness (ILI).
- BCHD was involved in case investigations of possible mpox in the beginning of the year.
- BCHD monitored outbreaks in other areas, such as: Marburg virus, Salmonella linked to small turtles, measles cases in Illinois and Wisconsin, and high blood levels (EBLs) in children who had consumed cinnamon-containing applesauce products that have high levels of lead.

Domain Two: Diagnose and investigate health problems and hazards in the community.

- Tracked COVID-19 hospitalizations and focused our efforts on COVID-19 in congregate settings such as long-term care facilities and assisted living care facilities.
- Conducted a total of 44 blood lead tests, 13 elevated blood level follow-ups, 23 Gonorrhea/Chlamydia tests, 18 Syphilis tests, 17 HIV tests, 8 chronic disease screenings, 22 DNA screenings, 4 pregnancy tests, 7 STI treatments, 2 T-spots, and 79 tuberculin skin tests.
- 71 hearing screenings, 66 vision screenings, and 19 school physicals were conducted
- BCHD conducted a total of 202 case investigations including: 99 Hepatitis C, 7 Haemophilus influenzae, 8 Lyme disease and 48 Hep B.

Domain Three: Provide health information, education and promote activities to reduce risk and promote improved health.

- Partnered for Vaccine Equity (PAVE) grant that focused on connecting people with influenza and COVID-19 vaccines at BCHD and on the mobile unit.
- Reached 45,645 individuals on Facebook through the PAVE communications campaign.
- Provided vaccine education through flyers, seminars, and radio programs, both in Spanish and English.
- BCHD facilitated numerous Diversity, Equity, Inclusion, and Justice (DEIJ) trainings and offered them to community partners, task forces, and coalitions. Topics include disability awareness, ableism, racial injustice and LBGTQIA+ awareness.

Domain Four: Mobilize community partnerships to identify and solve health problems.

- The COAR team attended and presented at the Comprehensive Opioid, Stimulant, and Substance Use Program (COSSUP) Conference in Virginia and presented on the implementation/use of the 900 Badge number, a referral system where police officers can call to place social workers with individuals experiencing a mental health crisis.
- Placed two naloxone cabinets in the Boone County community, expanding access to community members to access Narcan when responding to a drug overdose emergency.
- Restorative Justice programing in District 100, launched last year by the Boone County Drug Prevention Coalition, now includes the COAR team. This initiative helped implement new policies for positive behavior changes and less restrictive out of school practices and suspensions for youth.
- Spearheaded the Mobilizing for Action through Planning and Partnership (MAPP) process throughout 2024 and engaged numerous partners to assess the needs of the community and develop the community health improvement plan

Domain Five: Develop policies and plans that guide community health improvement and reduce negative health outcomes.

- The Strategic Plan Steering Committee revised initiatives and merged strategic goal groups. The mission, vision, and organization statements were revised based on feedback from staff and Board of Health with a focus on health equity.
- Developed a new Illinois Project for Local Area Needs (IPLAN) tracking sheet, which will track the progress of Taskforces and Coalitions towards IPLAN objectives and implemented it with the the Maternal Child Health Advisory Council, Boone County Drug Prevention Coalition, Behaviorial Health Taskforce and the Hunger Coalition.
- Reviewed and revised BCHD's Branding Policy, Communication Policy and, Interagency Communications Policy.

Domain Six: Enforce laws that protect the overall health and safety of the public.

- Conducted a total of 84 inspections at the Boone County Fair; two annually permitted mobile food trucks, six refrigerator trucks, and 76 temporary stands. There were 25 low-risk inspections, 56 medium-risk inspections, and three high-risk inspections.
- Completed routine food inspections with a 95.91% completion rate and follow-up inspections with 100% completion rate.
- Eight locations were monitored for West Nile Virus, three sites in Belvidere (one within the city limits), two sites in Caledonia, and then one site in each of the following: Poplar Grove, Capron, and Garden Prairie.
- Tobacco and alcohol compliance checks were done in the county and the City of Belvidere in collaboration with the Boone County Drug Prevention Coalition.
- Six tick drags were conducted as a part of the Illinois Department of Public Health's (IDPH) active tick surveillance program.

Domain Seven: Link to and provide care to prevent unfavorable health outcomes and preventable medical expenses.

- The Maternal Child Health Advisory Council implemented IRIS (Integrated Referral and Intake System), a system that facilitates universal agency to agency referrals and would help the Maternal Child Health population get connected with any resources they may need.
- The COAR team worked with Winnebago County CARE team which provides services in the county jail. A process was developed on communicating and collaborating regarding Boone County detainees in Winnebago County jail and vice versa to assist with scheduling services prior to release.
- The Crusader Behavioral Health Provider saw patients in the Boone County Jail to provide initial assessments and individual therapy services on-site and is also working in coordination with Crusader Clinic and provided medical services as needed.
- BCHD has met with RAMP to build stronger relationships between disability organizations and health departments, as well as discuss ways to eliminate as many barriers as possible for people with disabilities.

Domain Eight: Assure a competent workforce that is skilled in the core principles of public health practice.

- The Population Health Strategic Goal group developed questions and surveyed clients on how they receive services at BCHD. Management had follow-up discussions with staff members regarding the staff Trauma Informed Assessment survey.
- Staff trainings during FY 24 included topics on Conflict Management, De-escalation, LGBTQIA+ Current Trends, Immigration and Active Shooter.
- The EC Supervisor and Emergency Response Coordinator participated in the Sixth International Nuclear Emergency Exercise (INEX-6) led by the OECD-Nuclear Energy Agency, the Food Safety Module. The module consisted of a series of recovery challenges related to food safety. The Emergency Response Coordinator also participated in the Health Impacts Module.

Domain Nine: Improve the public health system's capacity to serve the population through quality improvement.

- Two Quality Improvement (QI) projects were selected, reviewed and approved by the Board of Health. The first QI project will be the Administrative project of PHAB Reaccreditation, which will begin in January of 2025.
- BCHD kicked off its EZEMRX Quality Improvement (QI) project. BCHD's billing platform, EZEMRX, has additional capabilities that BCHD has not previously used, including virtual consents and automatic text message reminders to clients.

Domain Ten: Research evidence from field-based and academic efforts to develop prevention and population health solutions.

- A Trauma Informed Assessment is ongoing. BCHD plans on completing a building walk through, interpersonal assessment, and client survey beginning in May. The Trauma Informed Assessment that was completed by staff showed that staff feel supported by each other, they generally feel emotionally safe at work, and they feel like leadership is generally transparent with them about how decisions are made.
- BCHD and the Boone County Hunger Coalition partnered with UIC College of Medicine and Pharmacy to recruit Boone County Residents to participate in a Type 2 Diabetes Education and Research project.
- NIU agreed to be a research partner/program evaluator for our CORS grant. They submitted a proposal for services which was written into the grant application and approved by Advocates for Human Potential who oversee the grant deliverables. NIU was also written into the DOJ SORT re-write grant.

Domain Eleven: Administration organizes and controls the effects of resources to achieve organizational goals.

- The Public Health Administrator attended numerous meetings and continued serving on committees throughout the 2024 fiscal year. Some notable meetings included the Northern Illinois Public Health Consortium (NIPHC) Legislative meeting, the National Association of County and City Health Officials (NACCHO), State Association of County and City Health Officials (SACCHO) meeting, the Illinois Public Health Association (IPHA) annual conference, and the Illinois Department of Public Health (IDPH) Region 1 Administrators meeting.
- The Public Health Administrator worked with architects and Boone County Administration to draft floor plans for expansion of the BCHD's portion of the administration campus. The new floor plans would accommodate the increase in full-time staff, allowing for more dedicated spaces to conduct privacy sensitive discussions and phone calls, as well as creating more space and allow on-site coalition and community meetings to resume. The proposed floor plan would allow for continued growth of the Department.

Domain Twelve: Engage and support the governing entity in sustaining and improving the public health infrastructure.

- BCHD and other public health groups continue to watch and discuss proposed bills that effect public health. A few watched this past year were: HB2099 Food Truck Freedom Act, HB4792 Closed-Loop Setbacks, SB 3301 Appropriates $ 10,000,000 from the General Revenue Fund to the Department of Public Health for local health protection grants for health protection programs
- Facilitated a County meeting with building, animal services, sheriff, state's attorney, and county administration to discuss the local nuisance code and ways to work more collaborative amongst the departments to address nuisance complaints and multi department condemnations
