

Tree Service Companies

This is not an endorsement. This is to help residents seek Tree Service Companies as needed in relation to Shade Trees or trees on the private residence. Shade Trees are the trees that are within the public street right of way within the Borough. Typically, these are located between the curb and sidewalk. If no curb or sidewalk exists, we would then need to check the street's right-of-way width to determine if the tree is considered a shade tree. A shade tree permit is required prior to the pruning (cutting), removing, or planting of a shade tree. The Shade Tree Committee meets once a month to review permits. Boro Code Chapter 187 covers Shade Trees.

Tree Services with documentation of a Certified Licensed Arborist on staff:
