Updates Regarding Water Main Break

December 28, 2024

Approximately 100 residences remain impacted by low to no water pressure.

Edison Water Utility Crews are excavating an area to put in a line stop at 20 inch main. Once inserted, it will stop the flow to the area of the break. Once the flow has stopped, the area will be drained, and crews will proceed to make repairs.

Edison Water Utility is aware of and has assessed a leaking valve in the area of Edison High School. The valve is not contributing to low pressure and is not a priority at this time.

Water distribution centers will remain open at all three locations until 10 pm.

The Sheraton Hotel located at 125 Raritan Center Pkwy, Edison, NJ 08837 is allowing residents impacted by water flow to utilize showers. Call (732) 225-8300 for 20 minute appt until 10 pm. Show valid ID to EPD Officer in lobby.

December 27, 2024

Due to restoration of water pressure throughout affected residences, restroom facilities will cease operation as they are no longer necessary.

Water distribution centers at Fire Station #1, Fire Station #2, and the Senior Center will be open due to the boil water advisory remaining in place.

As normal water flow resumes to residences, it is normal for meters to leak. Residents may contact Edison Police Dispatch at 732-248-7400 with questions or concerns regarding leaky meters.
