**Cora M. Middleton, City Clerk**

## OKLAHOMA FLOODPLAIN MANAGER ASSOCIATION

February 2, 2015

Mr. John Modzelewski P.E. CFM  
City of McAlester  
P.O. Box 578  
McAlester, OK 74502

Dear Mr. Modzelewski:

It is my pleasure to inform you Jennifer Santino of your staff became a Certified Floodplain Manager (CFM®) on January 16, 2015. Congratulations to the City of McAlester for having a staff member that knows their stuff when it comes to floodplain management. As you may be aware the Oklahoma Floodplain Managers Association, Inc. established the Certified Floodplain Manager Program in 1997. This nationally recognized CFM® program is a professional development and certification program designed to recognize the knowledge and technical skills of the state's floodplain managers.

To accomplish this task, Jennifer had to successfully pass a closed book, two hour certification exam designed to measure competency in the basic principles of sound floodplain management, a valuable part of the National Flood Insurance Program. In addition to this test, Jennifer was required to complete a rather arduous application that documented experience, education, training, references, and contributions to the profession of floodplain management. The final requirement for certification is membership in the Oklahoma Floodplain Managers Association Inc., of which Jennifer is a very valuable member.

Based on the magnitude of this accomplishment, I believe the City of McAlester is fortunate to have such a knowledgeable professional on your staff to protect the beneficial uses and functions of the natural floodplain in the City of McAlester. I want to thank you for supporting Jennifer in this effort and for the support given to the Oklahoma Floodplain Managers Association, Inc. Certainly, congratulations are in order for everyone's hard work. Please present this CFM® certificate and pin to Jennifer to promote this major accomplishment. When it comes to floodplain management CFMs® know their stuff. I also recommend you take a photograph of this presentation and publish it in your local paper with a short story about this outstanding accomplishment.

Sincerely,

Joseph R. Remondini, P.E., CFM  
Chair, PDCC

Enclosures

# OKLAHOMA FLOODPLAIN MANAGERS ASSOCIATION INC

Certifies that

**Jennifer Santino CFM**

is a

**CERTIFIED FLOODPLAIN MANAGER**

for meeting criteria in OFMA's nationally accredited  
Certified Floodplain Manager Program

unless renewed according to the OFMA Charter.

Certificate No. OK-15-00021

Certified January 16, 2015

*Joseph R. Remondini*

*Wendy Tracy*

The McAlester City Council met in Special session on Tuesday, February 3, 2015 at 5:30 P.M. after proper notice and agenda was posted, January 29, 2015, at 5:37 P. M..

**Call to Order**

Mayor Harrison called the meeting to order.

**Roll Call**

Council Roll Call was as follows:

Present: Weldon Smith, John Titsworth, Travis Read, Robert Karr, Buddy Garvin, Jason Barnett & Steve Harrison  
Absent: None  
Presiding: Steve Harrison, Mayor

Staff Present: Peter J. Stasiak, City Manager; John Modzelewski, P.E, City Engineer/Public Works Director; William J. Ervin, City Attorney and Cora Middleton, City Clerk

**Scheduled Business**

1. CONSIDER AND TAKE ACTION WITH RESPECT TO A RESOLUTION AUTHORIZING THE CALLING AND HOLDING OF AN ELECTION IN THE CITY OF MCALESTER, STATE OF OKLAHOMA, FOR THE PURPOSE OF SUBMITTING TO THE REGISTERED QUALIFIED ELECTORS OF SAID CITY THE QUESTION OF APPROVAL OR REJECTION OF THE CREATION OF INDEBTEDNESS BY THE MCALESTER PUBLIC WORKS AUTHORITY; AND CONTAINING OTHER PROVISIONS RELATING THERETO. *(Jon Wolff, Municipal Finance Services, Inc. and Allan Brooks, OK Public Finance Law Group PLLC)*

A motion was made by Councilman Smith and seconded by Vice-Mayor Read to approve RESOLUTION NO. 15-01, authorizing and calling for a Special Election to get approval to refinance 2002 Series Bond dept.

Before the vote, Jon Wolff addressed the Council reminding them that this matter had been reviewed at the previous meeting and this proposition, if approved, would allow the City to refinance bond debt at a lower interest rate.

There was no other discussion, and the vote was taken as follows:

AYE: Councilman Smith, Read, Titsworth, Karr, Garvin, Barnett & Mayor Harrison  
NAY: Councilman

Mayor Harrison declared the motion carried.

Recess Council Meeting

Mayor Harrison asked for a motion to recess the Special Meeting to convene the McAlester Public Works Authority. A motion was made by Vice-Mayor Read and seconded by Councilman Smith to recess the Special Meeting to convene the McAlester Public Works Authority.

There was no discussion, and the vote was taken as follows:

AYE: Councilman Read, Smith, Titsworth, Karr, Garvin, Barnett & Mayor Harrison  
NAY: None

Mayor Harrison declared the motion carried and the Special Meeting was recessed at 5:31 P.M.

Reconvene Council Meeting

The Special Meeting was reconvened at 5:32 P.M.

Adjournment

There being no further business to come before the Council, Councilman Smith moved to adjourn the meeting. The motion was seconded by Councilman Karr, and the vote was taken as follows:

AYE: Councilman Smith, Karr, Titsworth, Read, Garvin, Barnett & Mayor Harrison  
NAY: None

Mayor Harrison declared the motion carried and the meeting was adjourned at 5:33 P.M.

ATTEST:

\_\_\_\_\_  
Steve Harrison, Mayor

\_\_\_\_\_  
Cora Middleton, City Clerk

**TERMS AND CONDITIONS**

- 1. AGREEMENT:** Customer leases from CFS all the equipment described above (the "Equipment"). Customer agrees to pay to CFS the payments specified under "Number and Amount of Payments" above and such other amounts permitted hereunder as invoiced by CFS ("Payments"). A late payment fee of the greater of 10% of the late amount or \$10 will be due if a Payment is late. The term of this Agreement shall commence on the date the Equipment is accepted by Customer. Customer's execution of the Acceptance Certificate, or Customer's provision to CFS of other written confirmation of its acceptance of the Equipment, shall conclusively establish that the Equipment has been delivered to and accepted by Customer. If Customer has not, within ten (10) days after delivery of the Equipment, delivered to CFS written notice of non-acceptance of any of the Equipment, specifying the reasons therefor and specifically referencing this Agreement, Customer shall be deemed to have irrevocably accepted the Equipment. After acceptance of the Equipment, Customer shall have no right to cancel this Agreement, revoke acceptance or return the Equipment to CFS prior to the end of the scheduled term of this Agreement for any reason whatsoever. This lease is a net lease. Payments shall be made without set-off or deduction, even if the Equipment malfunctions. Customer authorizes CFS to adjust the payment and purchase option amounts stated above by up to 15% if the actual cost of the Equipment exceeds the supplier's estimate on which such amounts were based. Customer (a) shall pay a \$55 documentation fee and (b) agrees to pay any applicable taxes (including personal property tax), expenses, charges and fees imposed upon CFS or Customer with respect to the Equipment, the Payments or the Customer's performance or non-performance hereunder and shall reimburse CFS for the same plus processing fees (collectively, "Costs"). CFS may, but need not, apply "Security Deposits" or "Advance Payments" (neither earn interest unless required by law) to any amount in default and Customer shall promptly restore such amounts applied. Security Deposits and Advance Payments shall not be refunded to Customer until all obligations hereunder are discharged in full.
- 2. NAME; OFFICES:** Customer's legal name (as set forth in its constituent documents), is as set forth herein. Customer will not change its legal name, location of its chief executive office or corporate structure (including its jurisdiction of organization) without 30 days' prior written notice to CFS. Upon request, Customer will deliver state-certified constituent documents to CFS.
- 3. WARRANTIES:** CUSTOMER ACKNOWLEDGES THAT CFS IS NOT A MANUFACTURER, DEALER, OR SUPPLIER OF THE EQUIPMENT, AND AGREES THAT THE EQUIPMENT IS LEASED "AS IS" AND IS OF A SIZE, DESIGN, AND CAPACITY SELECTED BY CUSTOMER. CFS HAS MADE NO REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, WITH RESPECT TO THE EQUIPMENT, INCLUDING SPECIFICALLY ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. CFS shall not be liable for consequential, special, indirect or punitive damages. Any warranty with respect to the Equipment made by the supplier, dealer, or manufacturer is separate from, and is not a part of, this Agreement and CFS assigns such warranties, if any, to Customer. Customer acknowledges and agrees that the supplier is not an agent or representative of CFS and is not authorized to waive or alter any term of the Agreement, or make any representation for CFS about this Agreement or the Equipment. Customer warrants that the Equipment will not be used for personal, family or household purposes.
- 4. MAINTENANCE; ALTERATIONS; LOSS:** Customer will keep and maintain the Equipment in good working order and shall, at Customer's expense, supply and install replacement parts and accessories when required to maintain the Equipment. Any such changes or substitutions shall be the property of CFS and shall be deemed Equipment. Effective upon delivery to Customer, Customer shall (a) bear the entire risk of any loss, theft of, or damage to the Equipment, and (b) keep the Equipment insured with CFS as Loss Payee. If Customer fails to provide proof of insurance, CFS may insure the Equipment and charge Customer. No such loss, theft, or damage shall relieve Customer of any obligation under this Agreement.
- 5. DEFAULT:** If Customer fails to pay CFS, CFS will have the right to exercise any one or all of the following remedies in any order: (a) sue Customer for all past due Payments, ALL PAYMENTS TO BECOME DUE IN THE UNEXPIRED TERM, the Purchase Option amount set forth above and any other Costs (collectively the "Remaining Lease Balance"), (b) repossess the Equipment and (c) re-sell the Equipment and recover any deficiency. CFS (i) may sell the Equipment after preparing it or not, (ii) may disclaim warranties of title and the like, and (iii) may comply with applicable law, and these actions shall be deemed commercially reasonable. In the event the Equipment is not available for sale, the Customer shall be liable for the Remaining Lease Balance. Customer will also pay for CFS's reasonable collection and other costs which, in the case of a court action, 25% of the total amount sought shall be deemed reasonable.
- 6. ASSIGNMENT:** CUSTOMER SHALL NOT ASSIGN OR PLEDGE THIS AGREEMENT, NOR SHALL CUSTOMER SUBLET OR LEND ANY ITEM OF EQUIPMENT. CFS may pledge or assign this Agreement. Customer agrees that if CFS assigns this Agreement, the new owner will have the same rights and benefits that CFS has now and will not have to perform any of CFS's obligations. Customer agrees that the rights of the new owner will not be subject to any claims, defenses, or setoffs that Customer may have against CFS.
- 7. PURCHASE OPTION: (A) END OF TERM PURCHASE OPTION.** At the end of any term, Customer shall give CFS 60 days' prior irrevocable written notice (unless the Purchase Option is \$1.00) that it will purchase all the Equipment at the purchase option price indicated herein plus any Costs. (B) PRIOR TO MATURITY PURCHASE. Customer may, at any time, upon 60 days' irrevocable written notice purchase all the Equipment at a price equal to the sum of all remaining Payments plus the Fair Market Value plus Costs. "Fair Market Value" shall be CFS's retail price when Customer purchases the Equipment. Equipment purchases shall not be permitted if a default is continuing. Equipment purchases shall be "AS-IS WHERE-IS" without warranty, except for title.
- 8. RENEWAL; RETURN:** This Agreement automatically renews under the same terms and conditions on a month to month basis if Customer fails to give CFS 60 days' prior written notice of its intent to purchase or return the Equipment before the end of any term. Unless this Agreement automatically renews or Customer purchases the Equipment, Customer shall return the Equipment on the day the Agreement terminates in good operating condition at Customer's sole cost and expense to a location specified by CFS.
- 9. DATA:** Customer acknowledges that the hard drive(s) on the Equipment, including attached devices, may retain images, content or other data that Customer may store for purposes of normal operation of the Equipment ("Data"). Customer acknowledges that CFS is not storing Data on behalf of Customer and that exposure or access to the Data by CFS, if any, is purely incidental to the services performed by CFS. Neither CFS nor any of their affiliates has an obligation to erase or overwrite Data upon Customer's return of the Equipment to CFS. Customer is solely responsible for: (i) its compliance with applicable law and legal requirements pertaining to data privacy, storage, security, retention and protection; and (ii) all decisions related to erasing or overwriting Data. Without limiting the foregoing, Customer should, prior to return or other disposition of the Equipment, utilize the Hard Disk Drive (HDD) (or comparable) formatting function (which may be referred to as "Initialize All Data/Settings" function) if found on the Equipment to perform a one pass overwrite of Data or, if Customer has higher security requirements, Customer may purchase from its Canon dealer at current rates an appropriate option for the Equipment, which may include (a) an HDD Data Encryption Kit option which disguises information before it is written to the hard drive using encryption algorithms, (b) an HDD Data Erase Kit that can perform up to a 3-pass overwrite of Data or (c) a replacement hard drive (in which case the Customer should properly destroy the replaced hard drive). Customer will indemnify CFS, their subsidiaries, directors, officers, employees and agents from and against any and all costs, expenses, liabilities, claims, damages, losses, judgments or fees (including reasonable attorneys' fees) arising or related to the storage, transmission or destruction of the Data. This section survives termination or expiration of this Agreement.
- 10. MISCELLANEOUS:** THIS AGREEMENT SHALL BE GOVERNED BY NEW JERSEY LAW. ANY ACTION BETWEEN CUSTOMER AND CFS SHALL BE BROUGHT IN A COURT LOCATED IN THE COUNTY OF BURLINGTON OR CAMDEN, NEW JERSEY, PROVIDED THAT CFS AT ITS SOLE OPTION MAY BRING ANY SUCH ACTION IN A COURT WHERE THE CUSTOMER OR THE EQUIPMENT IS LOCATED. CUSTOMER AND CFS EACH IRREVOCABLY WAIVES ANY RIGHT TO A JURY TRIAL IN ANY SUCH PROCEEDINGS. CFS may accept a facsimile or other electronic transmission of this Agreement and acceptance certificate as an original. Customer agrees to reimburse CFS for and to defend CFS against any claim for losses or injury caused by the Equipment, both before and after termination of this Agreement. CFS may insert missing or correct other information otherwise this Agreement embodies the entire agreement.
- 11. UCC:** Customer authorizes CFS to file any form of financing or continuation statements and amendments thereto. CUSTOMER AGREES THAT THIS AGREEMENT IS INTENDED AS A "FINANCE LEASE" AS THAT TERM IS DEFINED IN ARTICLE 2A OF THE UNIFORM COMMERCIAL CODE AND THAT CFS IS ENTITLED TO ALL BENEFITS, PRIVILEGES AND PROTECTIONS OF A LESSOR UNDER A FINANCE LEASE AND CUSTOMER IRREVOCABLY WAIVES ANY RIGHT OF NOTICE THEREOF. If this Agreement is determined not to be a true lease, Customer grants CFS a security interest in the Equipment.

**PERSONAL GUARANTY**

The undersigned absolutely, irrevocably and unconditionally, jointly and severally, guarantee to CFS all payments and other obligations under this Agreement. This is an absolute and continuing guaranty. SECTION 10 ABOVE SHALL APPLY TO THIS PERSONAL GUARANTY. The undersigned waives any right to require any action against Customer or any other party before enforcing this Personal Guaranty.

## AGENDA REPORT

**Meeting Date:** March 10, 2015 **Item Number:** \_\_\_\_\_

**Department:** Finance

**Prepared By:** Toni Ervin/Sheila Norman **Account Code:** \_\_\_\_\_

**Date Prepared:** February 13, 2015 **Budgeted Amount:** \_\_\_\_\_

**Exhibits:** \_\_\_\_\_

### Subject

Consider and act upon, approval and signing a lease with Miller Office Supply and Canon Financial Services, Inc. for one high volume printer for the Utility Billing Office.

### Recommendation

Approve signing a lease with Miller Office Supply and Canon Financial Services, Inc. for one high volume printer for the Utility Billing Office.

### Discussion

The Finance Department solicited bids from 4 vendors on January 14, 2015 for a replacement printer for the utility billing department. After numerous requests, only one vendor, Miller Office Supply, responded with a lease price for this piece of equipment.

The current printer is broken and because of its age and the amount of copies (970,000) it has generated, it is not worth repairing. In the past year, we have spent \$2,535.00 for just ink and drums for the current copier and since we own it, we are responsible for all repairs.

Staff recommends that we lease a new printer for a cost of \$2,856.00 per year. Under the lease agreement, the vendor will be responsible for all printing supplies and any repairs necessary.

Staff feels that keeping the current printer would not be cost effective due to its age and that a leased printer would insure that there would be no expensive repairs necessary in the future.

**AUTHORIZATION AND CERTIFICATE OF CITY MANAGER/CHAIRMAN**

With reference to the above requisition, the undersigned certifies:

1. The above requisition is approved.

2. Each obligation therein has been properly incurred and is now due and unpaid and that insofar as such obligation was incurred for work, materials, equipment or supplies, such work was actually performed, and such materials, equipment or supplies were actually installed or delivered to or for the Project as evidenced by the certificate of the supervising architect or engineer or other appropriate certification.

3. That obligations in the stated amounts have been incurred by the Authority and that each item is a proper charge against the Construction Fund and has not been paid.

4. That there has not been filed with or served upon the Authority, notice of any lien, right to lien, or attachment upon, or claim affecting the right of any such persons, firms or corporations to receive payment of, the respective amounts stated in this requisition which has not been released or will not be released simultaneously with this payment.

5. That such requisition contains no item representing payment on account of any retained percentages which the Authority is at the date of such certificate entitled to retain.

[illegible]

City of McAlester  
Safety Office

Date: 12-30-2014

Reference: Property Damage Report

Location: 32 E. Morris

Damaged Property: On 12-30-14 at 8:30 A.M. a water line broke West of Always Welding at 32 E Morris. The building is owned by Mark Sanders, (918-426-9353). UTM crews fixed the line and it ruptured again late on 12-30-14. The damage occurred from the first line break. The owner has picked up a claim form from the City Clerk.

The front door to the building sits approx. 3-5 inches lower than the surrounding grounds. The owner said the building normally stays dry. He said this damage was from the water line breaking. Chad Kelly from UTM took a number of pictures that shows a large amount of water around structures in the area that came from the water break. He also took several pictures inside the structure at the time of the break. These pictures are attached to this report.

Ms. Cora Middleton  
City of McAlester  
P.O. Box 578  
McAlester, OK 74502

Re:	Member	:	City of McAlester
	Claimant	:	Mark Sanders
	Date of Loss	:	12/31/14
	Claim No.	:	141642-KW

Dear Ms. Middleton:

We have completed our investigation regarding the above referenced claim. It is our recommendation to the City of McAlester that this claim be denied. We find no liability on the City's part, regarding this incident.

Under the Governmental Tort Claims Act, 51 Okla. Sec 157(A), this claim will be deemed denied ninety (90) days after it was received by City of McAlester or on 4/9/15. 51 Okla. Stat. Sec 157 (B) requires any lawsuit under the Act to be commenced within one hundred eighty (180) days after denial of the claim.

Thus to begin the 180-day statute of limitations prior to 4/9/15 we suggest you docket this claim for denial at the next meeting of your municipal governing body. **For the 180-day period to start running, the claimant must be notified in writing at the address on the claim within five (5) days of the denial.** To document compliance with the Act, we recommend that you send notice of denial of the claim by certified mail.

Please advise us as soon as possible of any official action taken by the municipal governing body on denial of this claim.

Sincerely,

Kyle Waid  
Claims Examiner

RE: Member	:	City of McAlester
Claimant	:	Mark Sanders
Date of Loss	:	12/31/14
Claim No.	:	141642-KW

Dear Mr. Sanders:

As the adjuster for the Oklahoma Municipal Assurance Group, the general liability insurer for the City of McAlester, I am recommending denial of this claim and find no liability on the City's part for this claim.

Sincerely,

Kyle Waid

Meetings of the Planning Commission are held monthly on the 3<sup>rd</sup> Tuesday at 6:30 P.M. in the Council Chambers, Municipal Building.

### Excerpt from Ordinance No. 2285 (4-08-2008)

*(Amended Ordinance No. 1871 (8-27-1991))*

#### Sec 62-27. Composition; Appointment, Terms of Members

(a) The planning commission shall consist of eleven (11) members who shall be nominated by the mayor and confirmed by the city council for a term of three (3) years; provided in 2008 three (3) members nominated and confirmed shall serve for a period of three (3) years; in 2009 four (4) members nominated and confirmed shall serve for a period of three (3) years; in 2010 four (4) members nominated and confirmed shall serve for a period of three (3) years; and upon the expiration of their terms, respectively, successor members shall be nominated by the Mayor and confirmed by the city council for terms of three (3) years each. Appointments to fill vacancies shall be made by the mayor and confirmed by the council for the unexpired term only. State law reference-Members of Municipal Planning Commission 11 O.S. § 45-102.

### Excerpt from Ordinance No. 1871 (8-27-1991)

(b) In addition to the appointed members, the mayor and city engineer shall be ex-officio members of the planning commission.

(c) During the term of membership, any member who is absent for more than 50 percent of the meetings within a one-year period or three consecutive meetings, without good cause determined by the planning commission, shall automatically cease to be a member and a replacement shall be appointed by the mayor upon confirmation by the city council. State law reference-Planning commission membership, 11 O.S. § 45-102.

## Primus M. Moore

417 North 10<sup>th</sup> Street

McAlester, Ok 74501-4816

I was born and raised in McAlester. I Graduated from L'Ouverture High School in the Class of 1965. Received a B. S. degree in Education from Langston University in 1969.

I began my teaching career in Gary, Indiana. I taught school in Indiana for 12 years. I received a Master's degree in Elementary Education in 1979 from Indiana University.

I relocated back to McAlester in 1982 and begin teaching for McAlester Public Schools. With MPS, I taught

elementary and middle math and science, were a counselor and administrator. I received my counseling and administrative certification from East Central University. I also have Post Graduate credit from Purdue University, Northern Illinois University, and the University of Houston.

I retired from MPS after thirty-two years as Assistant Principal/Music teacher at Parker Intermediate Center and Director of S. Arch Thompson Auditorium. I currently work part time for MPS as a School Resource Officer.

I was appointed to the Planning Commission by Past Mayor Dale Covington.

I was an officer in the United States Army Reserves. I am an Elder at Trinity Lutheran Church.

I am a member of the Pittsburg County Sheriffs Reserve, Anderson-Grant Post 250 of the American Legion, Pittsburg County Youth Emergency Shelter Board of Directors, McAlester Community Choir, Balcony Brass, SOFA and the McAlester Area Woodcarvers.

I am a past member of the McAlester Morning Optimist Club, and the Pittsburg County Fair Board.

I have been married to my wife, Veronica for over 35 years. We have two children, and love to spend time with our grandchildren.

**Subject:** Re: Biography for Planning Commission

Karl Scifres has been a resident of McAlester almost all of his life. He retired from Kiamichi Technology Center in 2013 after a 34 year career in education. For 31 of those years, he was the Coordinator of Small Business Services at KTC. He was also with Zale's Jewelry for 4 years and was Store Manager here in McAlester for three of those years. He and his wife Kathy are the parents of two adult children and grandparents to Leah & Asher who live in Stillwater. Their son James is the Marketing & Technology Manager at Wilson Chevrolet in Stillwater and their daughter Kara is a 4th grade teacher in Ardmore.

Thanks -- Karl

## Carl Gullick BIO

Carl Gullick, a native of Greenville, SC was raised in Charlotte. He attended Wingate College, where he was Student Body President. He continued his education at UNC-Chapel Hill and was a Senior Class Marshall and Governor of the NC student Legislature.

His first job after graduation was as a senior aide in the U.S. Senate. In addition to other duties, he was in charge of the successful effort to save the New River. This represented the first time in history that Congress revoked a license issued by the Federal Power Commission.

He later went into a corporate career in Human Resources. He worked for Celanese and BASF, where he was an HR director. At American Thread, he was the Corporate Vice President of HR, and was in charge of multinational human resource operations. Later he formed Carolina Staff resources which he ran until he sold after eleven years. Since then he has been a consultant in the areas of governmental relations and economic development.

In 1992, he was elected to the York County Council and was then selected by the Council to be their Chairman. While Chairman, he conceived the Pennies for Progress program. He lobbied the legislature to change the law to make such a program possible. He has led the first campaign for public support. The program initially raised \$99.2 million. He also led the successful effort to obtain \$162 million for roads, to that was added another \$30 million.

He was the negotiator in efforts that resulted in over \$1 billion in new industrial investment in the county. Companies that came to York County as a result of these efforts included Black and Decker, U.S. Food Service, West Marine, and Tyco.

During Gullick's tenure the county's undesignated reserve fund was taken from a negative \$100,000 to a positive balance of over \$20 million. However, the county maintained the second lowest millage rate in the state and had its bond rating upgraded twice.

Also, the council adopted the York County Forever program that had preserved over 2,000 acres when Gullick retired from the council.

Gullick served a total of eight year on the board of directors of the Rock Hill Chamber of Commerce and The York County Regional Chamber of Commerce. In 2005 he served as the Chamber's Chairman.

In 2006, he was elected to the SC House of Representatives. During his second year in office he was one of only two legislators given the Champions of Public Education Award.

Gullick currently resides in McAlester, Oklahoma.

## BOARD of ADJUSTMENT

(As of 02-18-2015)

Name	Term Expiration	Address	Phone
Mark Emmons-Chairman	03/2016 (Appt 5-28-2013)	504 E. Wyandotte mark@emmonsphoto.com	426-4540 H 423-7488 W
Harvey Bollinger	March 31, 2017 (Appt 12-09-2014)	2702 Hardy Springs mcokie@sbcglobal.net	423-4166 H 429-9391 C
Ross Eaton	03/2016 (Appt 12-10-2013)	352 E. Washington ross@rosseaton.com	424-7278 C
Susan Kanard	03/2016 (Appt 5-28-2013)	Rt. 4, Box 451 skanard@allegiance.tv	423-5539 H 916-0353 C
Karen Stobaugh	03/2015	1 Miller Road info@whisperingmeadowswine.com	426-4404 H 423-4444 W 470-9972 C

Meetings of the board shall be held in the Council Chambers, Municipal Building at the call of the chairman and at such other times as the board may determine.

### Excerpts from Zoning Ordinance No. 1843 (2-14-1989)

#### Sec. 62-142. Membership.

(a) The board of adjustment shall be composed of five members, citizens of the city, each appointed by the mayor with the approval of the council for a term of three years; provided, however, that for the first appointment under the provisions of this article, one member shall be appointed for a term of one year; two members shall be appointed for a term of two years; and two members shall be appointed for a term of three years. Two alternate members shall be appointed for overlapping terms of two years. All appointments thereafter shall be for a term of three years.

(b) Not less than two members shall be appointed from the membership of the planning commission.

(c) The board shall elect a chairman from its membership to serve a term of two years.

State law reference-Membership of Board of Adjustment, 11 O.S. § 44-101.

#### Sec. 62-144. Powers generally.

The board of adjustment shall have the following powers:

(1) To hear and decide appeals where it is alleged there is an error in any order, requirement, decision, or determination made by an administrative official in the interpretation or enforcement of this article.

(2) Where, by reason of exceptional narrowness, shallowness or shape of a specific piece of property at the time of the original adoption of the regulations, or by reason of exceptional topographical conditions or other extraordinary or exceptional situation or condition of a specific piece of property, which condition is not generally prevalent in the area, the strict application of this article would result in peculiar and exceptional practical difficulties to, or exceptional and undue hardship upon the owner of such property, the board is hereby empowered to authorize upon an appeal relating to such property, a variation from such strict application so as to relieve such difficulties or hardship; but may establish such requirements relative to such property as would carry out the purpose and intent of this article.

	John C. Modzelewski,	Account Code:	
Prepared By:	P.E.,CFM		
Date Prepared:	February 18, 2015	Budgeted Amount:	
		Exhibits:	1

### Subject

Presentation and discussion of a Stormwater Utility Fee.

### Recommendation

Discussion and possible action, to authorize staff to proceed with development of a Stormwater Utility Fee.

### Discussion

A Stormwater Utility Fee will generate revenue to fund a stormwater program that will include infrastructure improvements identified in the *Master Drainage Plan for Tributary C of Sandy Creek Basin*, completed September 2012. The Stormwater Utility Fee will also fund additional projects identified in future drainage studies.

### Approved By

## City of McAlester, OK Stormwater Fee Scenarios

Scenario 1: Uniform Rates, Flat Fee	
Residential Collections:	\$233,262
Non-Residential Collections:	\$31,824
<b>Annual Total:</b>	<b>\$265,086</b>

*\$3 Single, \$1.50 Multi (Res. and Non-Res.) per month*

Scenario 2: Differentiated Rates, Flat Fee	
Residential Collections:	\$233,262
Non-Residential Collections:	\$49,572
<b>Annual Total:</b>	<b>\$282,834</b>

*\$3 Single, \$1.50 Multi (Res); \$4.50 Non-Res. per month*

Scenario 3: Impervious Areas, Single Rate - Estimated	
Residential Collections:	\$233,262
Non-Residential Collections:	\$462,024
<b>Annual Total:</b>	<b>\$695,286</b>

*\$3 Single, \$1.50 Multi (Res); \$3 Non-Res. Per ESU (est. 2,650 sqft), non-residential parcels and their impervious areas estimated -- per month*

Scenario 4: Impervious Areas, Differentiated Rates - Estimated	
Residential Collections:	\$233,262
Non-Residential Collections:	\$693,036
<b>Annual Total:</b>	<b>\$926,298</b>

*\$3 Single, \$1.50 Multi (Res); \$4.50 Non-Res. Per ESU (est. 2,650 sqft), non-residential parcels and their impervious areas estimated -- per month*

### Account Information Used:

#### Residential Accounts

Single-Unit 6045  
Multi-Unit 869 (in 60 units)

#### Non-Residential Accounts

Single-Unit 850  
Multi-Unit 68 (in 17 units)

Statewide, \$3 is the typical stormwater fee for residential customers and \$4.50 is the typical non-residential stormwater fee.

Communities using impervious areas to assess fees are roughly split between those charging all customers the same rate per ESU and charging non-residential customers higher rates per ESU.

Those communities using a method other than impervious areas to estimate the (typically significantly) higher demands imposed on stormwater systems by non-residential developments, such as meter size, tend to charge a higher rate to non-residential customers.

## SECTION 1. BACKGROUND

In May 2012, the City of McAlester contracted the service of Meshek & Associates, PLC to prepare a Master Drainage Plan for the upper 640 acres of the Tributary C drainage basin of Sandy Creek. The Tributary C Drainage Basin of Sandy Creek is bounded by E. South Avenue to the north, George Nigh Expressway to the south, Cardinal Lane to the west and Country Club Road to the east. The major drainage features identified in the basin are the 9<sup>th</sup> and Illinois Avenue storm sewer system, open channels between McArthur Lane and E. South Avenue, and the open channel that begins south of the intersection of Mallard Lane and Flamingo Avenue and continues north to the intersection of Hardy Springs Road and Douglas Avenue. The purpose of this study was to prepare hydrologic and hydraulic modeling for the Tributary C Drainage Basin of Sandy Creek, develop existing storm sewer models in known problem areas, evaluate alternative solutions for each problem area and provide cost estimates and recommendations for each problem area. **FIGURE 1-1** gives a general overview of the location and area studied in detail.

## SECTION 2. ANALYSIS

Hydrologic and hydraulic modeling of Tributary C of Sandy Creek was performed using HEC-HMS, HEC-GeoRAS and HEC-RAS, computer programs developed by the US Army Corps of Engineers. These programs are Windows-based and GIS-based versions of HEC-1 and HEC-2, long considered industry standards for hydrology and hydraulics. Storm sewer modeling was performed using StormCAD.

### 2.1 HYDROLOGIC ANALYSIS

The primary land use in the Tributary C Drainage Basin is residential with  $\frac{1}{4}$  acre lot sizes. The City provided topographic survey, storm sewer and utility data. Drainage areas were delineated based on the homogeneity of the watershed and the need for flow rates for hydraulic analysis. The basin has approximately 635 acres of drainage area with an average sub-basin size of approximately 19 acres. **FIGURE 2-1** shows the drainage basins and sub-basins for Tributary C. The hydrologic modeling for the Sandy Creek Tributary was performed using HEC-HMS version 3.3. The following assumptions were made in computing the hydrologic coefficients for the modeling.

Hydrologic Soil Group: Infiltration rates were correlated to runoff potential for the various soil types within the basins. All soils have a hydrologic soil group (HSG) classification that indicates the relative amount of runoff that can be expected from a soil type. Each sub-basin was assigned a Curve Number (CN) based on the HSG classification of the soil. The impervious areas were calculated using existing conditions in the basin and used to weigh the CN value assigned to each sub-basin. Fully developed conditions were not used to calculate impervious areas with the expectation that the City of McAlester will require any future development to provide detention which will not increase flow rates. These values are explained in detail and tabulated within **APPENDIX A**.

Hydrograph Development: The SCS Unit Hydrograph method was used in the analysis. Utilizing the total rainfall values and the CN value described above, the storm runoff volume is calculated from a given total rainfall. Peak flow rates and hydrograph shape are determined based on experimental data developed by the Soil Conservation Service (NRCS). This method is described in Section 4, "Hydrology" of the National Engineering Handbook, USDA, SCS August 1972.

Rainfall: **TABLE 2-1** below gives the rainfall depths used in the hydrologic analyses. This data was developed from Technical Paper No. 40 (TP-40) and from Hydrometeorological Report No. 35 (HYDRO-35).

**Storage Routing:** The stream reaches, within each basin where floodplains were developed, were studied in detail hydraulically using HEC-RAS. These streams are described in detail in separate sections of the report. The storage volumes for different flow rates were calculated during the hydraulic analysis for these reaches. These data were then applied to the HEC-HMS model, and runoff hydrographs were routed from point to point through the storage volumes calculated for each of these reaches. This enabled the effects of existing floodplain storage to be easily demonstrated. For those streams without hydraulic models, hydrographs were routed from point to point based on travel time.

The hydrologic coefficients used for input in the HEC-HMS model include the lag time, soil complex curve number (CN) and drainage area. A summary of hydrologic coefficients is presented in **TABLE 2-2** and more detailed data is listed in **APPENDIX A**. The existing hydrologic soil groups and existing condition land use are shown in **FIGURE 2-2** and **FIGURE 2-3** respectively.

The flow rates for existing conditions for the Tributary C Drainage Basin were estimated for 1-, 2-, 5-, 10-, 25-, 50-, 100- and 500-year frequency storms using HEC-HMS. Reach routing data were developed using two methods. In areas without detailed hydraulic analysis, a simple lag routing was developed by calculating the flow length and dividing by an estimated velocity to determine a lag time. In detailed study areas, the Modified Puls method was used to account for floodplain storage. Rating curves were developed for each reach using the hydraulic models discussed in **SECTION 2.2**. The HEC-HMS schematic, showing the connectivity of the hydrologic elements, can be found in **APPENDIX B**. A complete list of the flow rates for existing conditions is presented in **APPENDIX C**. **TABLE 2-3** shows the resulting flow rates at major junctions for this drainage basin.

## 2.2 HYDRAULIC ANALYSIS

The Tributary C Drainage Basin discharges into Sandy Creek. Detailed hydraulic analyses were performed for a portion of the open channel and the closed storm sewer systems. HEC-RAS version 4.1.0 was used for modeling the open channel and overland flows and the StormCAD version 8i was used to model the storm sewer systems for both existing and proposed conditions.

The following assumptions were incorporated in the hydraulic modeling and analysis processes:

1. Starting Water Surface Elevations: Normal depth was used as the downstream boundary condition for open channel analysis.
2. Existing Storage Volumes: In those basins for which floodplains were developed, the storage volumes were computed reach by reach within the hydraulic model for various flow rates. These values were used in the final HEC-HMS model to determine the effect of existing floodplain storage on peak flow rates. Final water surface profiles were then computed for each frequency.
3. Flooded Buildings and Floodplain Mapping: Updated floodplains created from this Master Drainage Plan Study for the 10-, 50-, 100-, and 500-year storm events are included in **APPENDIX D**. There are several structures that appear to be affected by the proposed floodplains. Some of these structures are outside of the effective FEMA special flood hazard areas. If the City planned to submit a grant to obtain funds from FEMA's Hazard Mitigation Grant Program, surveyed finished floor elevations and property information would be needed to calculate damages. Once these damages have been calculated, they can be compared with the cost of the project to determine a benefit – cost ratio. In order to be eligible for the grant program, the benefit – cost ratio must be greater than 1.0. Calculating damages is not a part of this project since there is not a plan to submit a grant application. However, it is not anticipated that calculated damages would be high enough to qualify for a grant at this time.
4. Storm Sewer Analysis: Known water surface elevations were used as a boundary condition for the storm analysis when available. The crown of the pipe was used in areas where the tailwater conditions were not known.

For the stream reaches studied, the major drainage features were identified and then modeled to determine their ability to convey the peak flows at each rainfall recurrence interval. Predicted areas of flooding were then mapped for the peak flows for the 1-, 2-, 5-, 10-, 25-, 50-, 100- and 500-year storms. Cross-sections were obtained from topographic data in the form of digital terrain models based upon the Aerial Photography and some newer topography data provided by the City of McAlester. Storm sewers were measured in the field for all areas of detailed study.

Existing condition data was prepared using HEC-GeoRAS; HEC-GeoRAS is a program developed by the US Army Corps of Engineers and is equipped with a set of procedures, tools, and utilities for processing geospatial data in ArcView using a Graphical User Interface (GUI). This interface enables the preparation of geometric data for import into HEC-RAS for modeling purposes, and processes simulation results exported from HEC-RAS, for floodplain mapping purposes. The GIS data supplied to the HEC-RAS models included stream centerlines, flow path centerlines, main channel bank stations and reach lengths, and cross section geometric data. Additionally, Manning's "n" values were also exported from HEC-GeoRAS to HEC-RAS based on a GIS representation of land use. In the Tributary C Drainage Basin, detailed hydraulic analyses was performed for approximately 8,560 feet of stream reach and is broken into two hydraulic models: Tributary C South and Tributary C North. The studied stream is shown in **FIGURE 2-1**. Detailed descriptions of these areas are discussed below.

Tributary C South begins approximately 1400 feet upstream of the intersection of Mallard Lane and Flamingo Avenue and extends north to the intersection of Hardy Springs Road and Douglas Avenue. The stream is conveyed in a natural grass-lined channel which transitions into a concrete lined channel just upstream of the culvert at Mallard Lane and Flamingo Avenue. The existing culvert at Mallard Lane and Flamingo Avenue consists of approximately 65 linear feet of triple 40 x 30 inch Corrugated Metal Pipes (CMPs) which transitions into approximately 145 linear feet of an 11 x 2.75 foot Reinforced Concrete Box (RCB). It continues north in a trapezoidal channel until it reaches another culvert at Quail Drive. The culvert at Quail Drive consists of approximately 125 linear feet of triple 40 x 30 inch Corrugated Metal Pipes (CMPs) which transitions into approximately 35 linear feet of an 8 x 3 foot Reinforced Concrete Box (RCB). It continues north in a trapezoidal channel until it reaches the intersection of Hardy Springs Road and Douglass Avenue.

Tributary C North begins at McArthur Avenue and extends north past E. South Avenue. There are two natural grass-lined channels at McArthur Avenue, one located at 10<sup>th</sup> Street and the other located just west of 13<sup>th</sup> Street. These two natural channels combine at Illinois Avenue and drain north until approximately 150 feet upstream of South Avenue where the grass-lined channels transitions into a concrete lined channel with a vertical concrete wall on the west side. At South Avenue the channels travels through a double 11.5 x 5.6 foot RCB culvert and then continues north in a concrete vertical walled channel.

A StormCAD model was used to analyze the capacity of the existing storm sewer systems. A detailed analysis was performed for the storm sewer system located near the intersection of 9<sup>th</sup> Street and Illinois Avenue and also for the system located at the intersection of 9<sup>th</sup> Street and MacArthur Avenue.

The studied storm sewer system begins at the intersection of 9<sup>th</sup> Street and Indiana Avenue with approximately 50 linear feet of 24" RCP which drains north into approximately 215 feet of 30" x 18" RCP until it reaches Illinois Avenue. At this point, the system drains east in

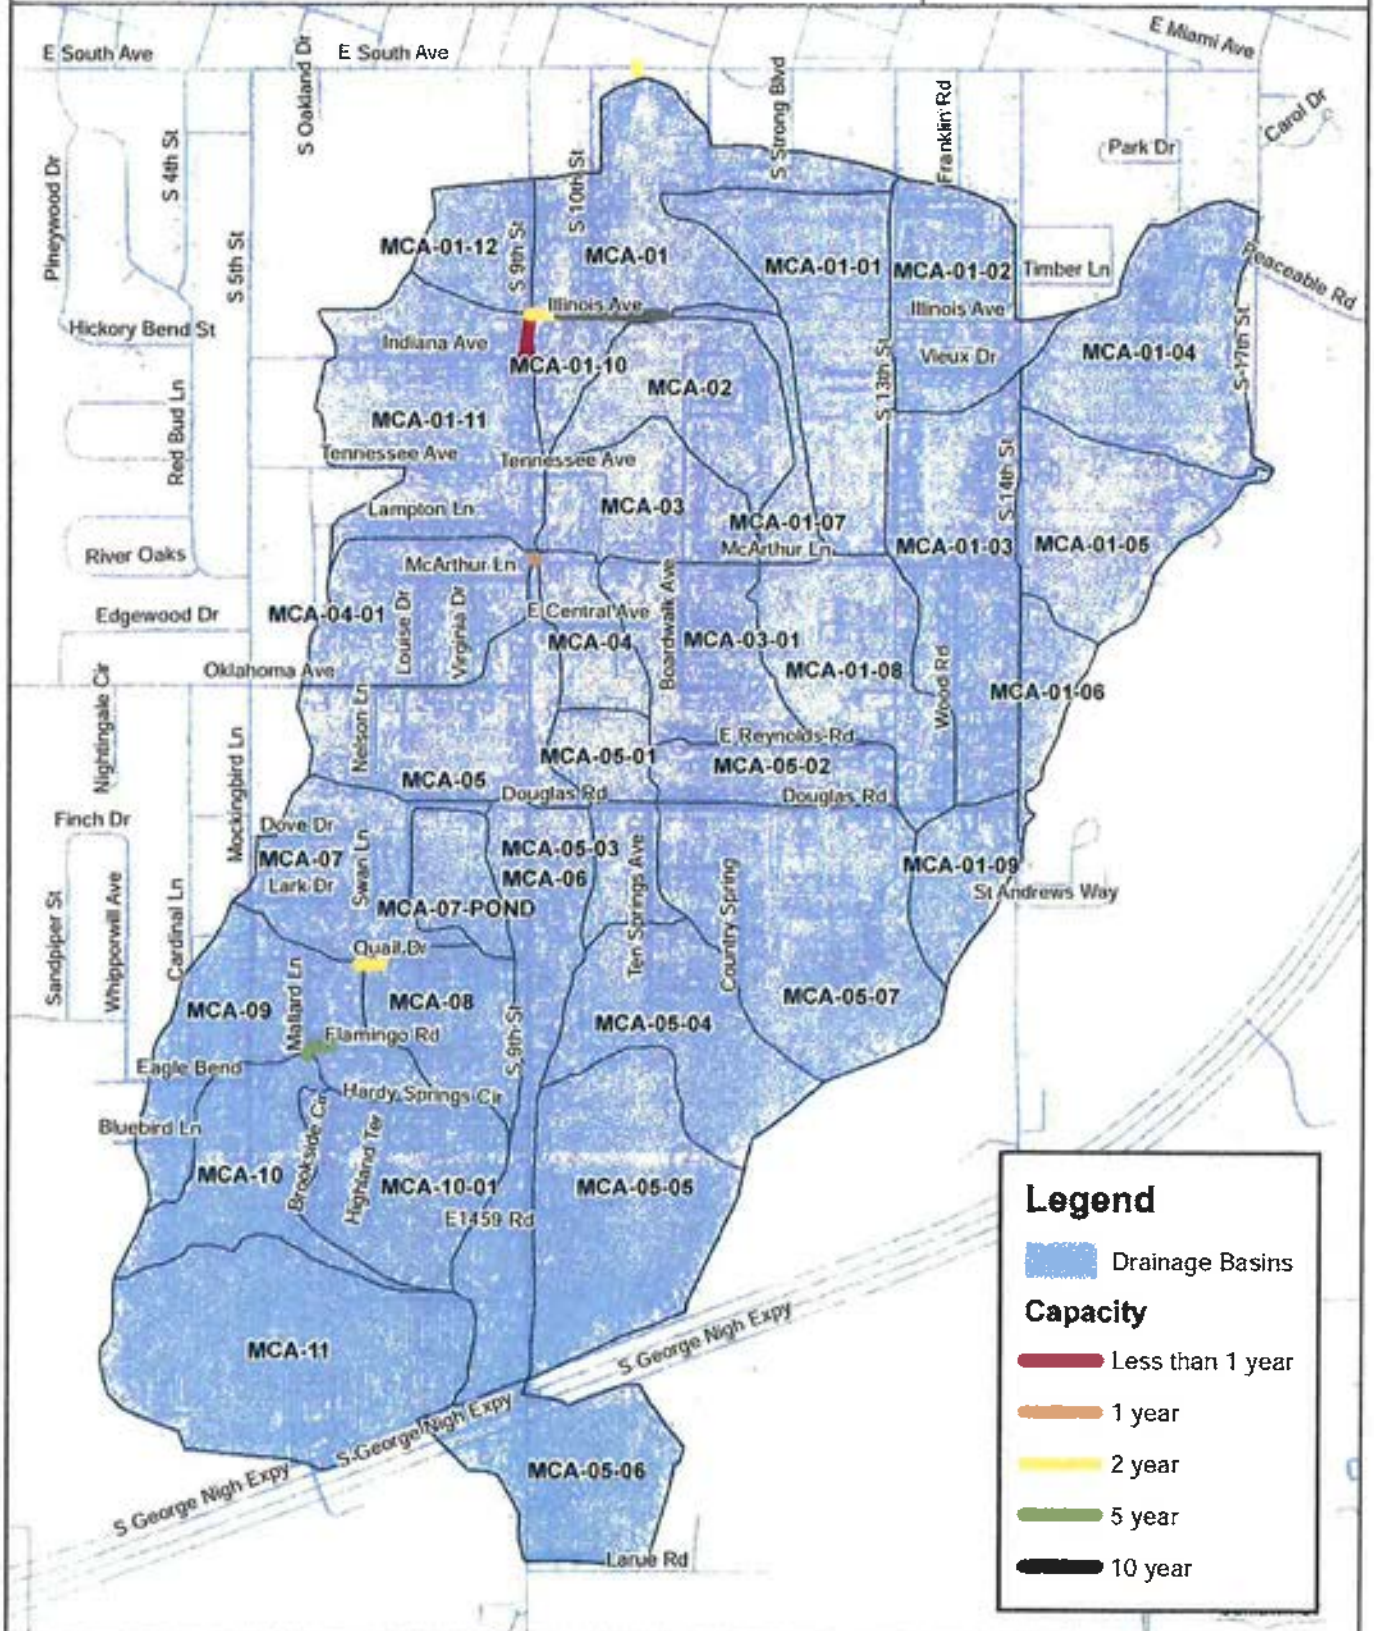

approximately 160 feet of 26" x 36" RCB and then transitions into approximately 570 linear feet of 72" x 48" CMP which extends to the outfall. This system includes a trench grate at the intersection of 9<sup>th</sup> Street and Illinois Avenue which is approximately 35 feet in length. The trench grate is a Neenah Foundry Grate R-4999-L9 and has a capacity of 107 cfs. This system also contains three curb inlets which have a less than one year capacity.

The studied system located at the intersection of 9<sup>th</sup> Street and MacArthur Avenue consists of a trench grate which is approximately 15 feet in length and is a Neenah Foundry Grate R-4999-L9 and has a capacity of 46 cfs. The trench grate drains east in a single 24 inch CMP for approximately 48 linear feet which outfalls into a vertical walled concrete lined ditch. The existing storm sewer systems and pipe capacities are shown in **FIGURE 2-4**.

Computed flow rates from HEC-HMS were input into the HEC-RAS model. The resulting water surface profiles from the HEC-RAS model were processed by HEC-GeoRAS for floodplain mapping which is included in **APPENDIX D**.

# Tributary C McAlester MDP

## 2.3 PROBLEM AREAS

### 2.3.1 Problem Area 1: The Existing Culvert at Mallard Lane and Flamingo Avenue

The existing culvert at the intersection of Mallard Lane and Flamingo Avenue is a triple 40 x 30 inch CMP which transitions into an 11 x 2.75 foot RCB and has a capacity which conveys the 5-year storm event. The existing channel upstream of the culvert is graded at a slope of 5.8% which causes storm water velocities to reach 13.8 fps and will promote erosion on the upstream side of the culvert.

### 2.3.2 Problem Area 2: The Existing Culvert at Quail Drive

The existing culvert at Quail Drive is a triple 40 x 30 inch CMP which transitions into an 8 x 3 foot RCB and has a capacity which conveys the 2-year storm event.

### 2.3.3 Problem Area 3: Intersection of 9<sup>th</sup> Street and MacArthur Avenue

There are several complaints of flooding at this intersection. The storm sewer system at this location consists of a trench grate which is approximately 30" in width and 15 feet in length which drains into a 24" CMP and outfalls into a vertical walled concrete channel. The capacity of the existing trench grate is approximately 39.4 cfs which conveys a 1-year storm event and the 24" CMP also conveys the 1-year storm event.

### 2.3.4 Problem Area 4: Closed Storm Sewer System at 9<sup>th</sup> Street and Illinois Avenue

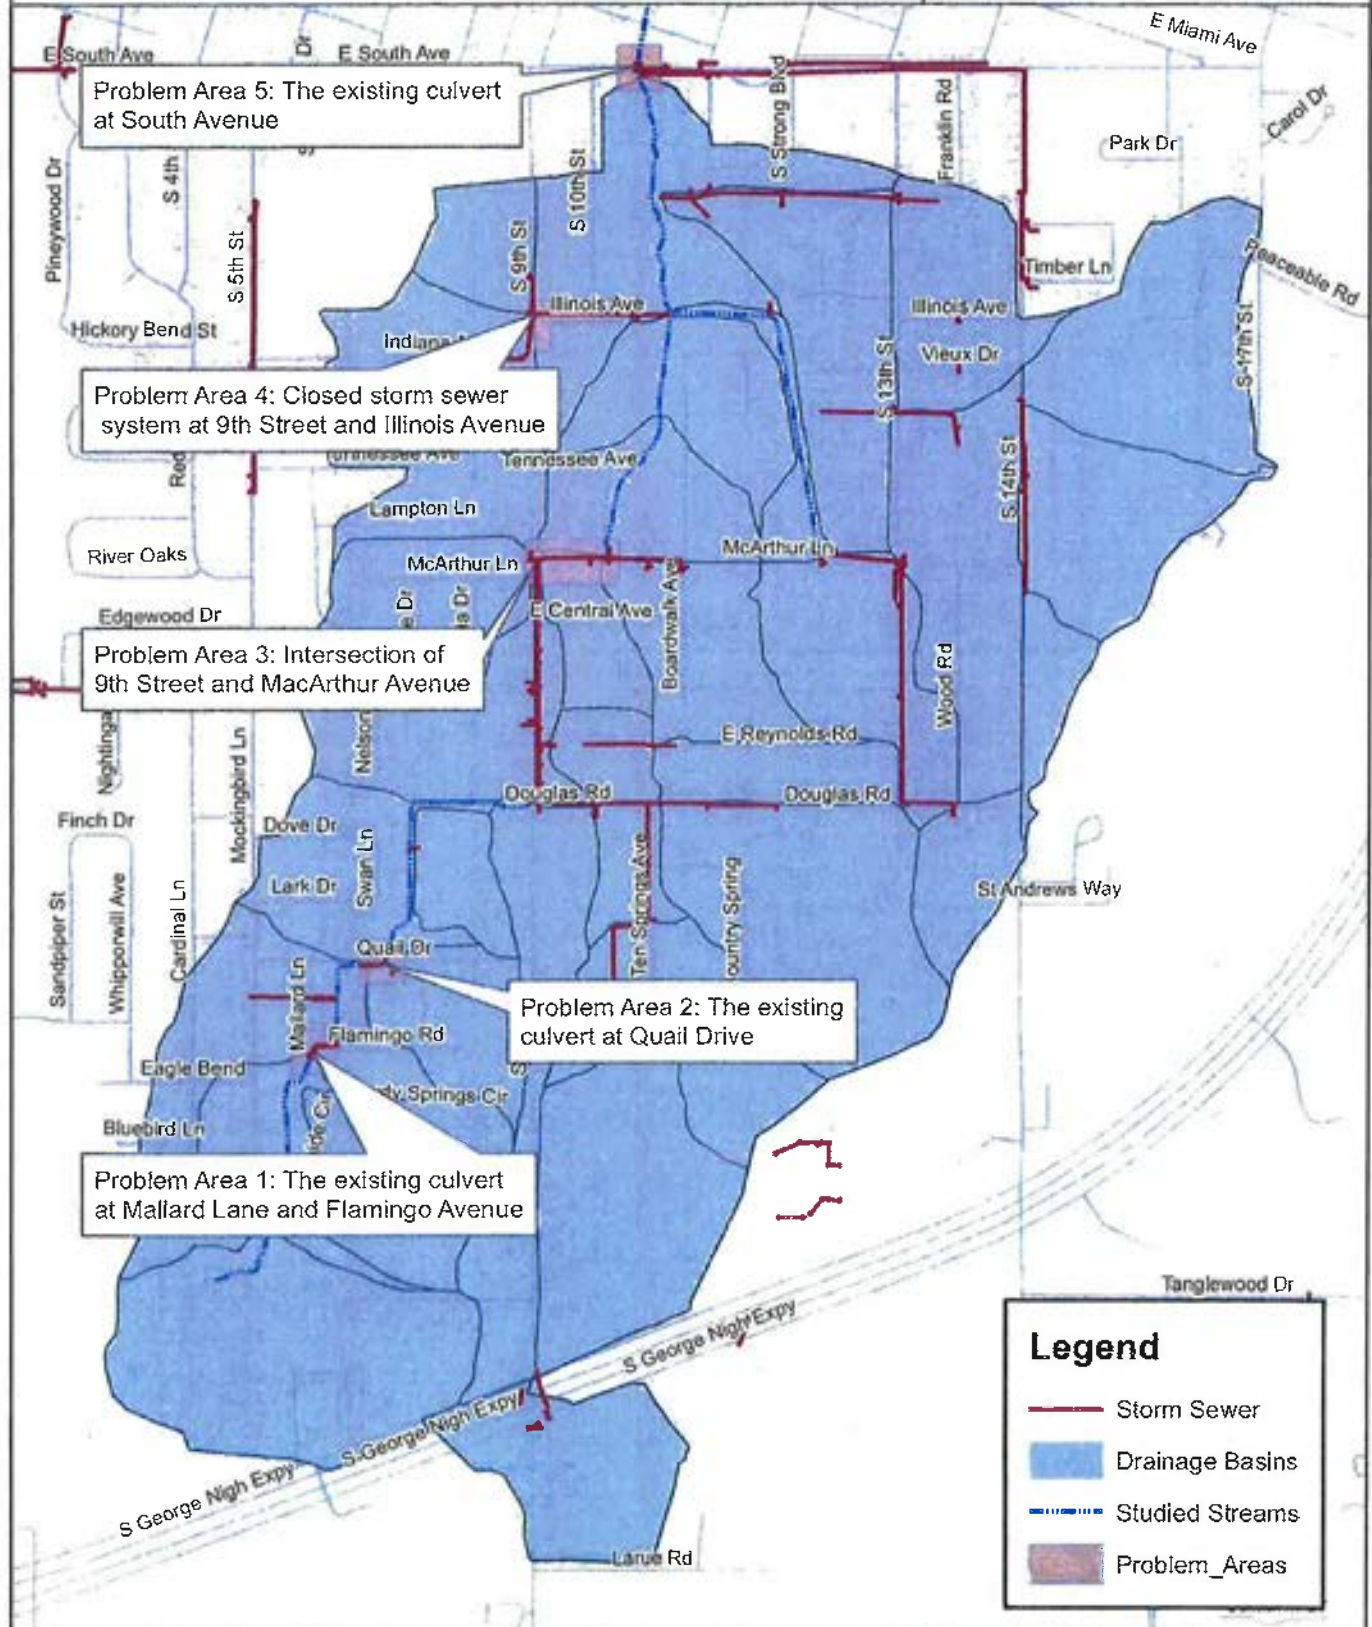

The existing closed storm sewer system begins at the intersection of 9<sup>th</sup> Street and Indiana Avenue. The upper end of the closed system has a capacity of less than 1-year while the lower end of the system has a 10-year capacity. The system is constructed at shallow depths with its greatest depth of pipe cover being approximately 1.40 feet. The existing curb inlets have a less than one year capacity and the existing trench grate, which consists of approximately 35 linear feet of a Neenah Foundry Type R-4999-L9 grate, can capture 107 cfs, assuming 0.5 feet of head.

### 2.3.5 Problem Area 5: The Existing Culvert at South Avenue

The existing box culvert at South Avenue is a double 11.5 x 5.6 foot RCB and has a capacity which conveys the 2-year storm event.

### SECTION 3. EVALUATION OF ALTERNATIVES

#### 3.1 PROBLEM AREA 1 – ALTERNATIVE 1 – CULVERT AT MALLARD LANE AND FLAMINGO AVENUE (25-YEAR CAPACITY)

This alternative proposes extending the existing 11 x 2.75 foot RCB, which will remain, with approximately 60 linear feet of double 6 x 2.5 foot RCB on the upstream side. This alternative also proposes a new vertical walled concrete lined channel for approximately 130 linear feet upstream of the proposed box culvert. The proposed channel will have a bottom width of approximately 11.75 feet and vertical walls approximately 3.5 feet in height. The proposed channel will be graded to drain at a slope of approximately 1.8% and reduce velocity ranges to 3.46-6.17 fps. Both the channel and box culvert are designed to convey the 25-year (4% Annual Chance) storm event. The normal depth of water in the channel for the 25-year storm would be approximately 2.5 feet. This alternative is shown in **FIGURE 3-1** and the cost estimated for this alternative is \$201,500 and is included in **APPENDIX E**.

#### 3.2 PROBLEM AREA 1 – ALTERNATIVE 2 - CULVERT AT MALLARD LANE AND FLAMINGO AVENUE (25-YEAR CAPACITY WITH DETENTION)

This alternative proposes leaving the existing culvert in place and increasing the capacity by building a detention pond approximately 1000 feet upstream of the culvert. The pond would be located northwest of the A-1 Mini Storage Building and southwest of the cul-de-sac on Brookside Circle. The pond would have a footprint of approximately 1.2 acres and provide 7.2 acre-ft of storage during peak flows. The outfall structure of the proposed pond would be approximately 120 linear feet of 24 inch RCP. The pond would reduce the flow rates at the existing culvert from 48%-61% and would increase the existing culvert capacity to a 25-year storm event. The pond would also reduce flow rates throughout the system. **TABLE 3-1** shows the flow rates at major junctions throughout the basin with the proposed pond installed. **TABLE 3-2** shows the reduction in flow rates when compared to existing conditions. This alternative is shown in **FIGURE 3-2** and the cost estimated for this alternative is \$249,700 and is included in **APPENDIX E**. Since the cost associated with the detention facility is related to alternatives for problem areas 1 and 2, its' cost is separated from any additional cost associated with culvert replacement or channelization and should not be double counted. The area assumed available for detention also has a potential for residential development and would also need to be considered in determination of recommended plan.

### 3.3 PROBLEM AREA 1 – ALTERNATIVE 3 - CULVERT AT MALLARD LANE AND FLAMINGO AVENUE (100-YEAR CAPACITY WITH DETENTION)

This alternative proposes removing the existing 40 x 30 inch CMPs and extending the existing 11 x 2.75 foot box culvert with approximately 60 linear feet of double 6 x 2.5 foot RCB and increasing its' capacity by building a detention pond approximately 1000 feet upstream of the culvert. The pond would be located northwest of the A-1 Mini Storage Building and southwest of the cul-de-sac on Brookside Circle. The pond would have a footprint of approximately 1.2 acres and provide 7.2 acre-ft of storage during peak flows. The outfall structure of the proposed pond would be approximately 120 linear feet of 24 inch RCP. The pond would reduce the flow rates at the existing culvert from 48%-61% and would increase the proposed culvert capacity to a 100-year storm event. The pond would also reduce flow rates throughout the system. **TABLE 3-1** shows the flow rates at major junctions throughout the basin with the proposed pond installed. **TABLE 3-2** shows the reduction in flow rates when compared to existing conditions. This alternative also proposes a new vertical walled concrete lined channel for approximately 130 linear feet upstream of the proposed box culvert. The proposed channel will have a bottom width of approximately 11.75 feet and vertical walls approximately 3.5 feet in height. The proposed channel will be graded to drain at a slope of approximately 1.8% and reduce velocity ranges to 2.61-5.48 fps. This alternative is shown in **FIGURE 3-3** and the cost estimated for this alternative is \$451,300 and is included in **APPENDIX E**. Since the cost associated with the detention facility, \$249,700, is related to alternatives for problem areas 1 and 2, its' cost should be separated from any additional cost associated with culvert replacement or channelization and should not be double counted.

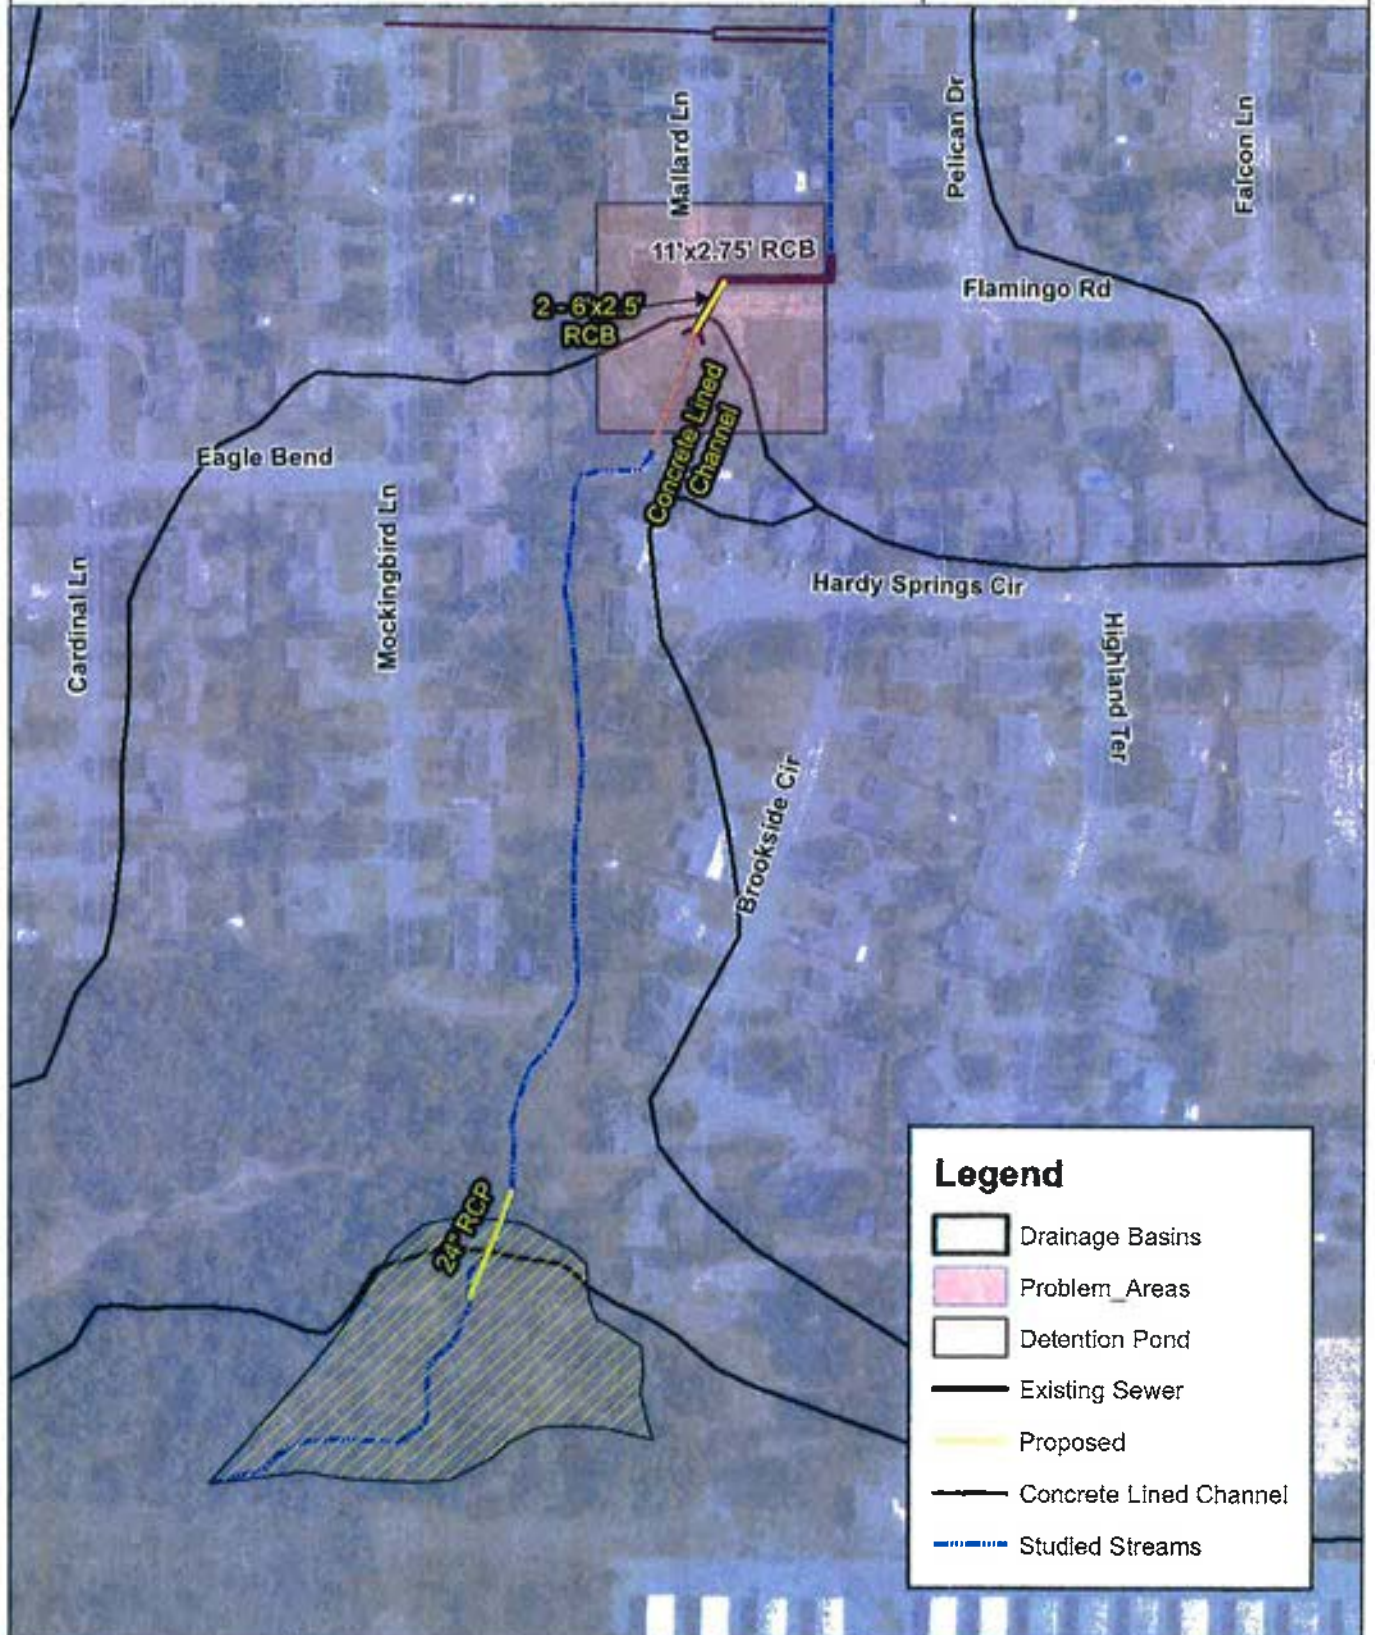

### 3.4 PROBLEM AREA 2 – ALTERNATIVE 1 - CULVERT AT QUAIL DRIVE (25-YEAR CAPACITY)

This alternative proposes removing the existing 40 x 30 inch CMPs and extending the existing 8 x 3 foot box culvert, which will remain, with approximately 130 linear feet of 8 x 3 foot RCB. Both the existing channel and proposed box culvert are designed to convey the 25-year (4% Annual Chance) storm event. The normal depth of water in the existing channel for the 25-year storm would be approximately 1.7 feet upstream and 2.7 feet downstream of the proposed culvert. This alternative is shown in **FIGURE 3-4** and the cost estimated for this alternative is \$234,800 and is included in **APPENDIX E**.

### 3.5 PROBLEM AREA 2 – ALTERNATIVE 2 - CULVERT AT QUAIL DRIVE (100-YEAR CAPACITY WITH DETENTION)

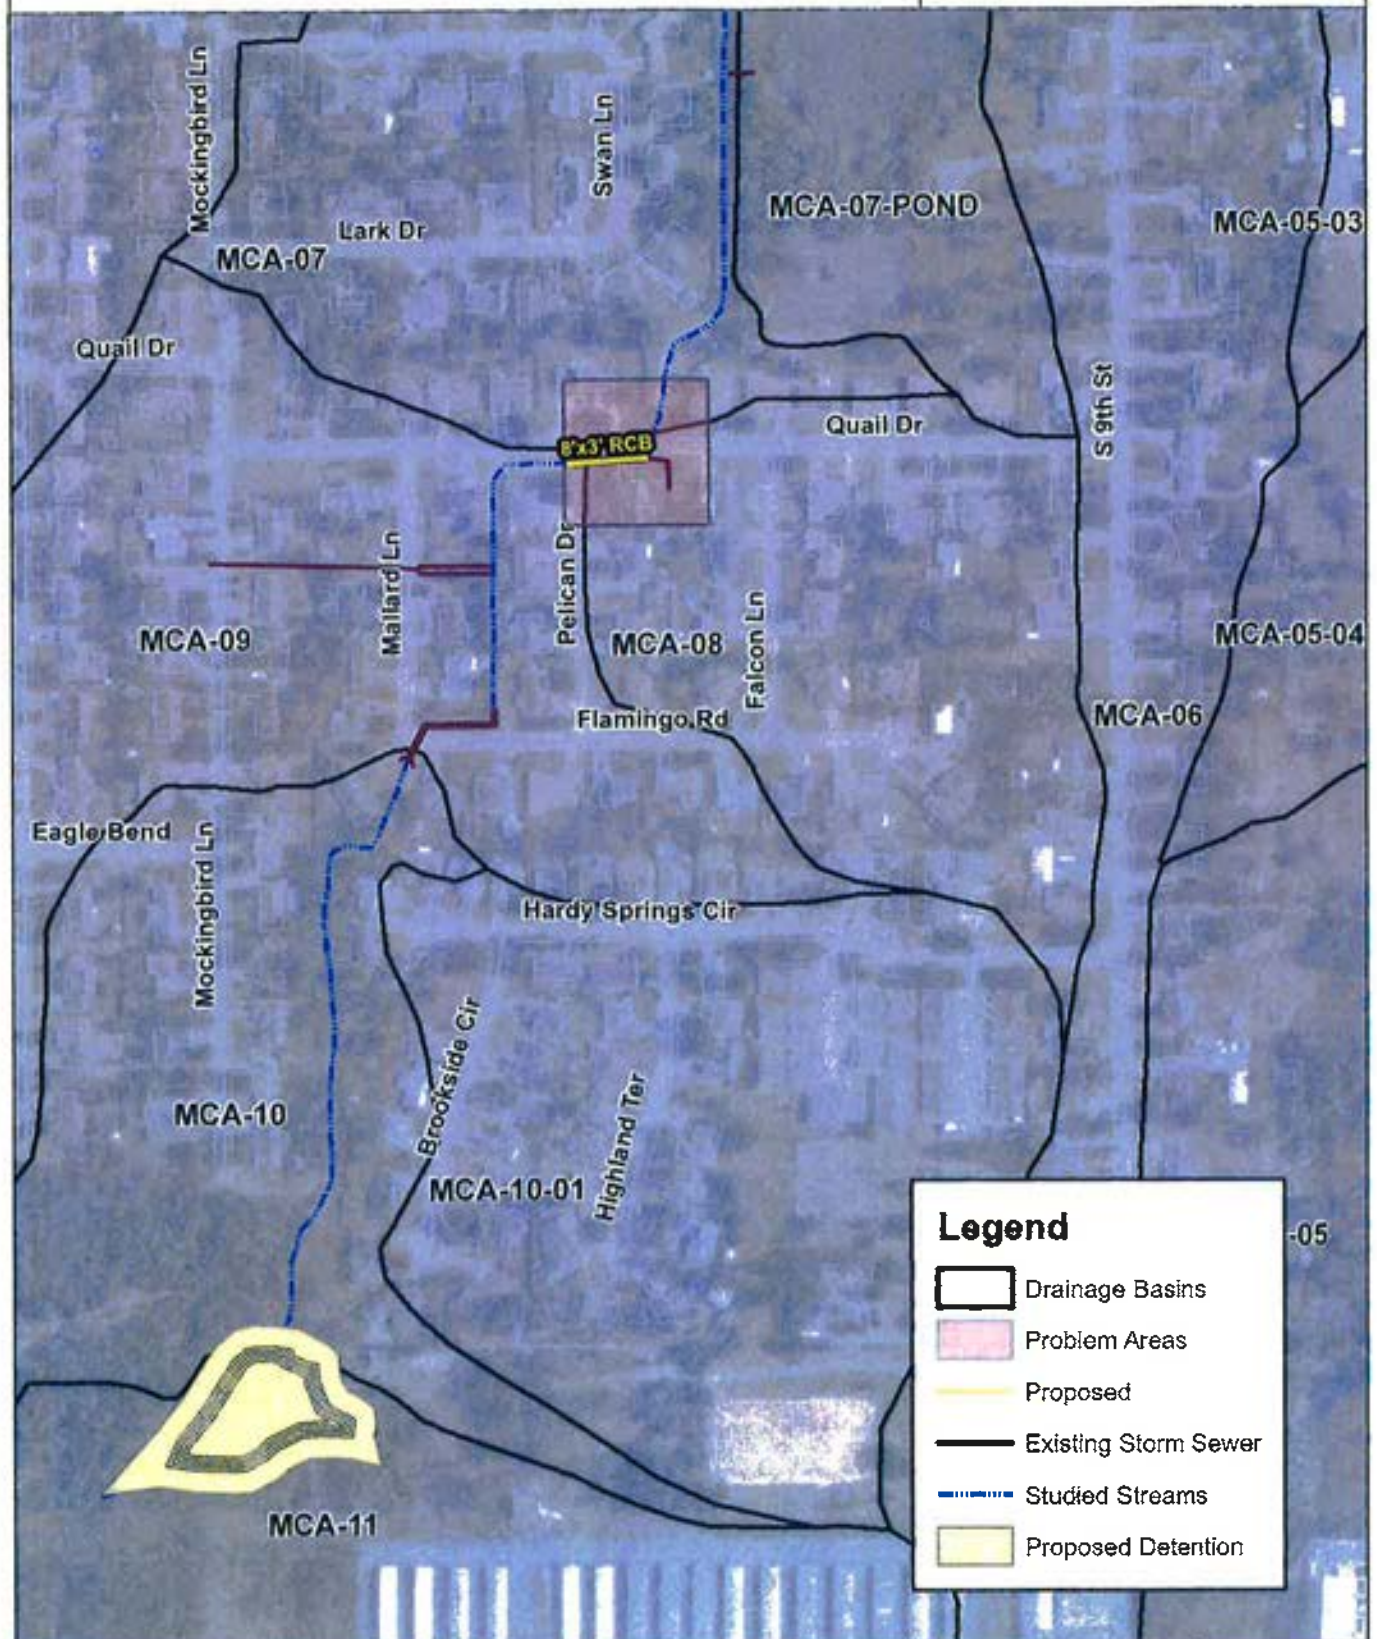

This alternative proposes removing the existing 40 x 30 inch CMPs and extending the existing 8 x 3 foot box culvert with approximately 130 linear feet of 8 x 3 foot RCB and increasing its' capacity by building a detention pond approximately 1000 feet upstream of the culvert located at Mallard Lane and Flamingo Avenue. The pond would be located northwest of the A-1 Mini Storage Building and southwest of the cul-de-sac on Brookside Circle. The pond would have a footprint of approximately 1.2 acres and provide 7.2 acre-ft of storage during peak flows. The outfall structure of the proposed pond would be approximately 120 linear feet of 24 inch RCP. The pond would reduce the flow rates at the existing culvert from 12%-34% and would increase the proposed culvert capacity to a 100-year storm event. The pond would also reduce flow rates throughout the system. Due to the physical constraints of roadway cover and channel dimensions, without detention, the Quail Drive culvert would be unable to convey the 100-year storm event. **TABLE 3-1** shows the flow rates at major junctions throughout the basin with the proposed pond installed. **TABLE 3-2** shows the reduction in flow rates when compared to existing conditions. This alternative is shown in **FIGURE 3-5** and the cost estimated for this alternative is \$484,500 and is included in **APPENDIX E**. Since the cost associated with the detention facility, \$249,700, is related to alternatives for problem areas 1 and 2, its' cost should be separated from any additional cost associated with culvert replacement or channelization and should not be double counted. So if problem area 1 is addressed with the proposed detention alternative, then the cost for this alternative would be \$234,800 (the difference of \$484,500 and \$249,700), since the cost of constructing the pond would have already been incurred.

### 3.6 PROBLEM AREA 3 – ALTERNATIVE 1 - INTERSECTION OF 9TH STREET AND MACARTHUR AVENUE (10-YEAR CAPACITY)

This alternative proposes increasing the capacity of the existing system to convey a 10-year storm event by increasing the size of the existing inlet and closed storm sewer pipe. This alternative includes extending the existing Neenah Foundry Trench Grate inlet with an additional 20 lineal feet of a Neenah Foundry Trench Grate R-4999-L9 and increasing the existing pipe with approximately 48 linear feet of 36-inch RCP. A water depth of 2.5 feet is assumed in the downstream concrete vertical wall channel to account for tailwater conditions. Both the inlet and concrete pipe are designed to convey the 10-year (10% Annual Chance) storm event. This alternative is shown in **FIGURE 3-6** and the cost estimated for this alternative is \$71,900 and is included in **APPENDIX E**.

### 3.7 PROBLEM AREA 3 – ALTERNATIVE 2 - INTERSECTION OF 9TH STREET AND MACARTHUR AVENUE (100-YEAR CAPACITY)

This alternative proposes increasing the capacity of the existing system to convey a 100-year storm event by increasing the size of the existing inlet and closed storm sewer pipe. This alternative includes extending the existing Neenah Foundry Trench Grate inlet with an additional 30 linear feet of a Neenah Foundry Trench Grate R-4999-L9 and increasing the existing pipe with approximately 48 linear feet of 48-inch RCP. A water depth of 3.5 feet is assumed in the downstream concrete vertical wall channel to account for tailwater conditions. Both the inlet and concrete pipe are designed to convey the 100-year (1% Annual Chance) storm event. This alternative is shown in **FIGURE 3-7** and the cost estimated for this alternative is \$74,400 and is included in **APPENDIX E**.

### 3.8 PROBLEM AREA 4 – ALTERNATIVE 1 - CLOSED STORM SEWER SYSTEM AT 9TH STREET AND ILLINOIS AVENUE (10-YEAR CAPACITY)

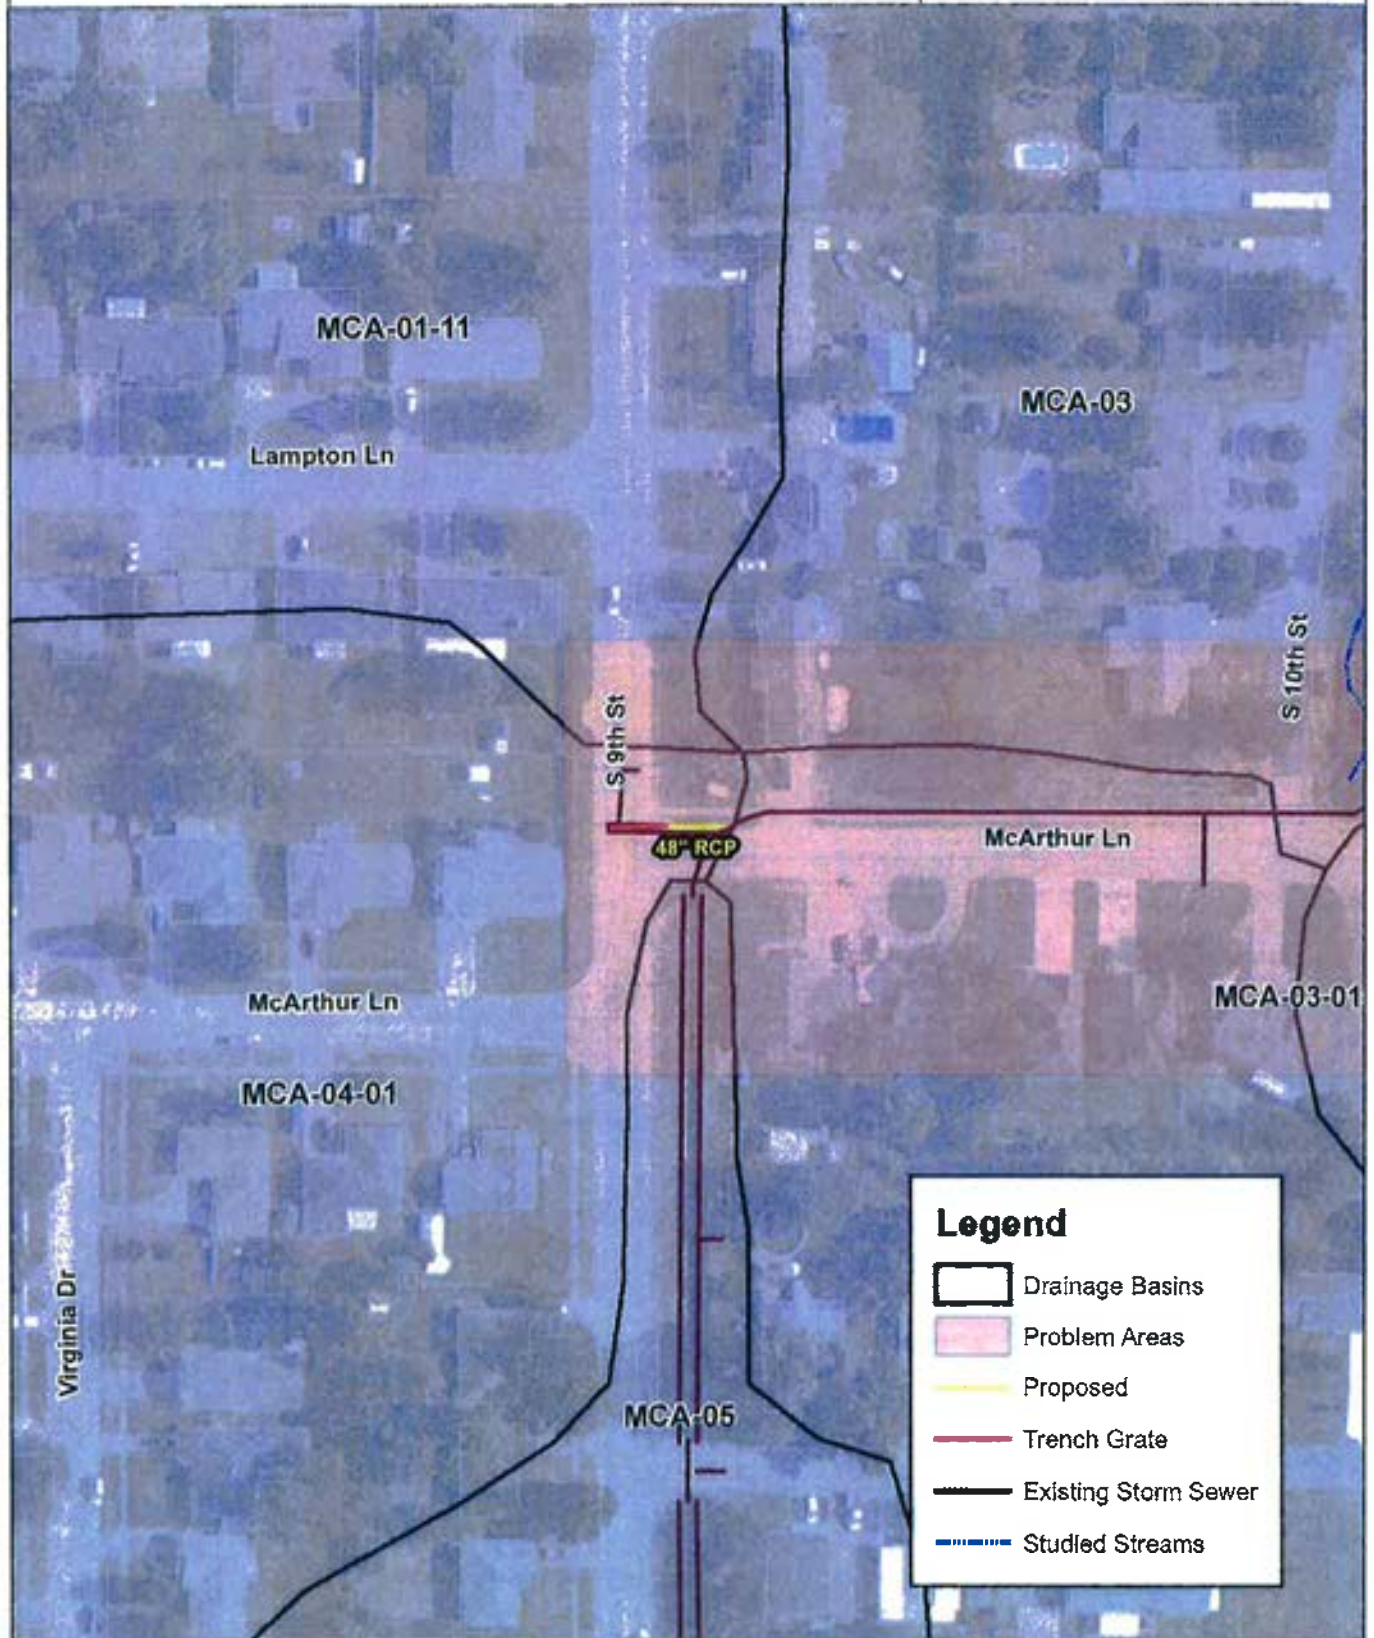

This alternative proposes increasing the capacity of the existing system to convey a 10-year storm event. Although pipe would be cheaper, reinforced concrete boxes must be used in this area due to the limitations of pipe cover. A box provides more volume with less depth when compared to a pipe. The proposed system will begin at the intersection of 9<sup>th</sup> Street and Indiana Avenue and drain north with approximately 260 linear feet of proposed 4 x 3 foot RCB until it reaches the existing trench grate at Illinois Avenue. The existing trench grate is able to capture the 10-year flows and will not be replaced. The proposed system then drains east in approximately 160 linear feet of 4 x 3 foot RCB and continues east in approximately 570 linear feet of 4 x 4 foot RCB which outfalls into the existing ditch. The existing curb inlets located at upstream of the trench grate have a less than one year capacity and will be replaced. This alternative is shown in **FIGURE 3-8** and the cost estimated for this alternative is \$1,302,400 and is included in **APPENDIX E**.

### 3.9 PROBLEM AREA 4 – ALTERNATIVE 2 - CLOSED STORM SEWER SYSTEM AT 9TH STREET AND ILLINOIS AVENUE (10-YEAR CAPACITY WITH DIVERSION)

This alternative proposes increasing the capacity of the existing system to convey a 10-year storm event by creating a diversion at the intersection of 9<sup>th</sup> Street and Tennessee Avenue and increasing the size of the existing closed storm sewer system. This alternative would capture and divert 30% of the flow that was originally captured at 9<sup>th</sup> Street and Illinois Avenue. The diversion begins at the northwest corner of the intersection of 9<sup>th</sup> Street and Tennessee Avenue with proposed inlets which drain east in approximately 590 linear feet of 30 inch RCP and outfall into the existing ditch. This alternative also requires upsizing the pipes on the upstream portion of the existing system with approximately 420 linear feet of 4 x 3 foot RCB. This alternative is shown in **FIGURE 3-9** and the cost estimated for this alternative is \$1,080,200 and is included in **APPENDIX E**.

### 3.10 PROBLEM AREA 5 – ALTERNATIVE 1 - CULVERT AT SOUTH AVENUE (5-YEAR CAPACITY)

This alternative proposes increasing the capacity of the existing double 11.5 x 5.6 foot RCB to convey a 5-year storm event by constructing a detention pond. The proposed detention pond will be located just south of Illinois Avenue, just west of Belmont Drive, east of 9<sup>th</sup> Street, and north of Tennessee Avenue. The pond will cover approximately 2.8 acres, provide 12.5 acre-ft of storage during a 5-year storm event, and will decrease the flow rates at South Avenue by 30% from 1137cfs to 802cfs. The proposed pond will have an outlet structure consisting of approximately 50 linear feet of 60 inch RCP. This alternative is shown in **FIGURE 3-10** and the cost estimated for this alternative is \$473,200 and is included in **APPENDIX E**.

### 3.11 PROBLEM AREA 5 – ALTERNATIVE 2 - CULVERT AT SOUTH AVENUE (10-YEAR CAPACITY)

This alternative proposes increasing the capacity of the existing double 11.5 x 5.6 foot RCB to convey a 10-year storm event by constructing a detention pond and increasing the existing box size. The proposed detention pond will be located just south of Illinois Avenue, just west of Belmont Drive, east of 9<sup>th</sup> Street, and north of Tennessee Avenue. The pond will cover approximately 4.5 acres, provide 21.4 acre-ft of storage during a 10-year storm event, and will decrease the flow rates at South Avenue by 31% from 1541cfs to 1057cfs. The proposed pond will have an outlet structure consisting of approximately 50 linear feet of 60 inch RCP. In addition to detention, this alternative includes replacing the existing culvert with approximately 40 linear feet of a triple 10 x 5 foot RCB culvert and widening the existing concrete lined channel immediately upstream and downstream of South Avenue to transition from the proposed culvert width to tie into the existing channel widths. **TABLE 3-3** shows the flow rates at major junctions throughout the basin with the proposed pond installed. **TABLE 3-4** shows the reduction in flow rates when compared to existing conditions. This alternative causes a rise in water surface elevations downstream of South Avenue. **TABLE 3-5** shows the existing water surface elevations at cross sections downstream of Illinois Avenue. **TABLE 3-6** shows the proposed water surface elevations at cross sections downstream of Illinois Avenue and the proposed pond. **TABLE 3-6** shows the change in water surface elevations at cross sections downstream of Illinois Avenue and the proposed pond when compared with existing conditions. This alternative is shown in **FIGURE 3-11** and the cost estimated for this alternative is \$991,800 and is included in **APPENDIX E**.

## SECTION 4. RECOMMENDED PLAN

### PROBLEM AREA 1 RECOMMENDED PLAN: CULVERT AT MALLARD LANE AND FLAMINGO AVENUE

The recommended plan for problem area 1 is Alternative 3. The existing culvert consists of 3-40 x 30 inch CMP which transitions to an 11 x 2.75 foot RCB. The recommended plan removes and replaces the existing 40 x 30 CMP with 2-6 x 2.5 foot RCB. Alternative 3 increases the capacity of the system to convey a 100-year storm event by building a detention pond upstream of the problem area that leaves a footprint of approximately 1.2 acres. Although the recommended plan is the most expensive, costing approximately \$451,300, it has more benefit because it reduces flow rates throughout the system as shown in **TABLE 3-2**. The recommended plan is shown in **FIGURE 3-3** and the cost estimate is included in **APPENDIX E**.

### PROBLEM AREA 2 RECOMMENDED PLAN: CULVERT AT QUAIL DRIVE

The recommended plan for problem area 2 is Alternative 2. The existing culvert at Quail Drive consists of 3-40 x 30 inch CMP which transition into an 8 x 3 foot RCB. To maximize the capacity of the existing 8 x 3 foot RCB, this plan also recommends replacing the existing 3-40 x 30 inch CMP with 8 x 3 foot RCB. This recommendation includes the same detention pond proposed for problem area 1 and increases the capacity to a 100-year storm event. The total cost for this project is approximately \$484,500, of which \$250,000 is associated with the cost of the detention pond. The recommended plan is shown in **FIGURE 3-5** and the cost estimate is included in **APPENDIX E**.

### PROBLEM AREA 3 RECOMMENDED PLAN: INTERSECTION OF 9TH STREET AND MACARTHUR AVENUE

The recommended plan for problem area 3 is Alternative 2. Alternative 2 increases the capacity of the existing system to a 100-year storm event. This problem area is restricted by both inlet and pipe capacity. By increasing the inlet size along with a short length of pipe, the capacity of this system is dramatically improved. The cost of this recommended project is approximately \$74,400 which is only \$2500 more than the 10-year alternative. The recommended plan is shown in **FIGURE 3-7** and the cost estimate for this alternative is included in **APPENDIX E**.

### PROBLEM AREA 4 RECOMMENDED PLAN: CLOSED STORM SEWER SYSTEM AT 9TH STREET AND ILLINOIS AVENUE

The recommended plan for problem area 4 is Alternative 2. This recommendation increases the capacity of the existing system to convey a 10-year storm event. Alternative 2 consists of creating a diversion at 9<sup>th</sup> Street and Tennessee Avenue which will divert 30% of local flow off the existing system. Alternative 2 also consists of increasing the existing pipe sizes on the upstream portion of the existing system. The cost of this recommended plan is approximately \$1,080,200 which is \$222,200 cheaper than Alternative 1 and provides the same capacity. The recommended plan is shown in **FIGURE 3-9** and the cost estimate for this alternative is included in **APPENDIX E**.

---

#### PROBLEM AREA 5 RECOMMENDED PLAN: CULVERT AT SOUTH AVENUE

The recommended plan for problem area 5 is Alternative 2. This recommendation increases the capacity of the existing system to convey a 10-year storm event. Alternative 2 proposes building a 4.5 acre detention pond that decreases the flow rates by 31%. It also proposes increasing the existing double 11.5 x 5.6 foot RCB to a triple 10 x 5 foot RCB culvert. This alternative is more expensive than Alternative 1; however it takes advantage of the capacity of the existing concrete channel which has at least a 10-year capacity both upstream and downstream of South Avenue. The recommended plan is shown in **FIGURE 3-11** and the cost estimated for this alternative is \$991,800 and is included in **APPENDIX E**.

# McAlester City Council

## AGENDA REPORT

Meeting Date:	February 24, 2015	Item Number:	3
Department:	Police	Account Code:	
Prepared By:	Darrell Miller	Budgeted Amount:	\$31,100.00
Date Prepared:	February 12, 2015	Exhibits:	4

### Subject

Consider and act upon, approval to purchase thirty-nine (39) new and unused compact wearable video systems.

### Recommendation

Motion to approve the purchase of thirty-nine (39) compact wearable video systems from Digital Ally.

### Discussion

The police department has been conducting studies concerning officers wearing compact video systems. Staff feels this is a needed tool to assist the officers in everyday duties which is a huge benefit for officers, citizens, the City of McAlester and provide evidence in the prosecution of criminals in the judicial system.

The department went out for bids for the compact wearable video systems and received two separate bids.

One bid is from Viewu LLC in the amount of \$899.95 per unit and the other is from Digital Ally Inc. in the amount of \$695.00 per unit.

Upon reviewing the bids, staff recommends the bid be awarded to Digital Ally for \$695.00 per unit.

The department is going to purchase thirty-nine units at this time which is enough for every patrol officer, one for CID and a couple of additional spare units.

Staff also recommends purchasing a docking station which will allow up to twelve officers to download the information simultaneously to the computer and charge the camera batteries.

The cost of thirty-nine cameras is \$27,105.00 and the docking/charging system is \$3,995.00.

We have received a grant in the amount of \$9,730.00 and we have visited with OMAG and anticipate they will contribute towards the purchase of the bodycams.

### Approved By

**TERMS OF SALE**

Your purchase of goods from Digital Ally, Inc., a Nevada corporation ("Digital Ally") will be governed by the following terms of sale ("Terms"). You will be referred to throughout these Terms as "you".

**1. Exclusion of Other Terms; Entire Agreement.** Additional or different terms or conditions proposed by you (including any additional or different terms provided in a purchase order) will be void and of no effect unless specifically accepted in writing by Digital Ally. Digital Ally's sales invoice, these Terms, the warranty and any special conditions executed by you and Digital Ally (collectively, the "Order") supersedes and cancels all prior communications between us, whether verbal or written, and constitutes the entire agreement between us unless modified in writing and signed by each of us.

**2. Payment.** Payment terms are cash on delivery, except where credit has been established and maintained to Digital Ally's satisfaction. If you have established credit, payment terms are net 30 days from date of shipment. Any invoice that you fail to pay when due will bear interest at the rate of 1-1/2% per month or the highest rate then permitted by law, whichever is less. You must also reimburse Digital Ally for its costs incurred (including internal administrative expenses and reasonable attorneys' fees) in the collection of your past due invoices.

## AGENDA REPORT

### TABLED FROM PREVIOUS MEETING

Meeting Date:	February 24, 2015	Item Number:	4
Department:	Community & Economic Development	Account Code:	N/A
Prepared By:	Leroy Alsup, Director	Budgeted Amount:	N/A
Date Prepared:	February 17, 2015	Exhibits:	Two

#### Subject

Consider and act upon, an ordinance amending Chapter 62, Land Development Code, of the McAlester City Code by amending Sections 62-203, 62-204 and 62-205 pertaining to automobile sales and service as a use permitted after review in the C-3 general commercial district, and as a use permitted in C-4 restricted commercial district, and C-5 highway commercial and commercial recreation district; repealing all conflicting ordinances and **declaring an emergency.**

#### Recommendation

Motion to act upon and approve the above ordinance amending Chapter 62, Land Development Code, of the McAlester City Code by amending Sections 62-203, 62-204 and 62-205 pertaining automobile sales and service as a use permitted after review in the C-3 general commercial district, and as a permitted use in C-4 restricted commercial district, and C-5 highway commercial and commercial recreation district; repealing all conflicting ordinances and **declaring an emergency** and **authorizing** the Mayor to **sign** the ordinance.

#### Discussion

At the February 10, 2015 City Council Meeting, the Council tabled this item and requested that staff revise the Ordinance Amendment to make automobile sales and service a use permitted after review in the C-3 general commercial district, but leave the language clarifying the permitted use new and used automobile sales and service in C-4 restricted commercial district, and C-5 highway commercial and commercial recreation district.

The following documents are attached for your reference:

1. Draft Ordinance to amend Sections 62-203, 62-204 and 62-205 pertaining to automobile sales and service.
2. Sec. 62-128. Procedure for authorizing uses permitted after review.

- (4) Any other store or shop for retail trade or for rendering personal, professional or business service which does not produce more noise, odor, dust, vibration or traffic than those above.
- (5) Churches, provided they have major street frontage as shown on the major street plan, and meet the minimum lot area requirements as shown heretofore in section 62-200 (d) (1) d.
- (6) Mobile home courts-In compliance with the following requirements:
- The applicant, upon making application for a zoning clearance permit, must submit a detailed site plan locating all mobile home stands, screening or fencing, and plans and specifications for the proposed park in a form suitable for making the determinations required herein.
  - The proposed site shall be a minimum of 2 1/2 acres in size and shall contain no more than 15 mobile home stands per acre. The proposed site shall have a minimum frontage of 200 feet on a street designated as a major street or collector street in the major street plan. All access or egress by automobile will be on such streets. The proposed site shall be a minimum of 200 feet in depth.
  - It shall be the intention of the proposed plan for the mobile home park to accommodate primarily permanent occupants with no more than ten percent of the mobile home stands devoted to purely transient purposes. These purely transient stands are to be located in one area of the park so they will in no way interfere with the permanent residents.
  - The proposed site shall have a front yard of not less than 20 feet from the corner or line of any mobile home stand to the street boundary of the park. The site shall have side and rear yards of ten feet solid fencing, screen planting or wall of six feet in height.
  - The proposed site shall be screened or buffered on all sides with a solid wall fence six feet in height or a screen planting which will attain at least six feet in height.
  - The proposed site shall provide one off-street parking space for each mobile home stand, plus one additional off-street parking space for each two mobile home stands.
  - The proposed site shall provide a connection for each mobile home stand to all public utilities, i.e., sewer, water, and other facilities necessary for the health, safety, and general welfare of the public.

SECTION 2. That all other ordinances or parts of ordinances in conflict herewith are hereby repealed to the extent of any such conflict or inconsistency and all other ordinances not in conflict herewith shall remain in full force and effect.

SECTION 3: That an emergency is hereby declared to exist, and for the provision of the public peace, health and safety, by reason whereof it is necessary that all acts take effect immediately and be in full force and effect from, and after the passage and approval.

PASSED and the EMERGENCY CLAUSE ruled on separately this \_\_\_\_\_ day of \_\_\_\_\_  
\_\_\_\_\_ 2015.

Approved as to form and legality this \_\_\_\_\_ day of \_\_\_\_\_ 2015.

By: \_\_\_\_\_  
William J. Ervin, City Attorney

**Sec. 62-128. Procedure for authorizing uses permitted after review.**

The uses listed under the various districts herein as uses permitted after review are so classified because they more intensely dominate the area in which they are located than do other uses permitted in the district; however, the nature of such uses makes it desirable that they be permitted to locate therein. The following procedure is established to integrate properly such uses permitted after review with the other land uses located in the district. These uses shall be reviewed and authorized or rejected under the following procedure:

- (1) An application is to be filed with the city planning commission for review. The application shall show the location and intended use of the site, the names of all the property owners and existing land uses within a 300-foot radius of the exterior boundary of the subject property and any other material pertinent to the request which the planning commission may require.
- (2) The planning commission shall hold one or more public hearings thereon.
- (3) The planning commission shall within 45 days of the date of application, transmit to the city council its report as to the effect of such proposed building or use upon the character of the neighborhood, traffic conditions, public utilities, and other matters pertaining to the general welfare, and the recommendation of the planning commission concerning use thereon. Thereupon the city council may authorize or deny the issuance of a building permit for the use of land or buildings as requested.

(Ord. No. 1843, § 1 (art. VII, § 3), 2-14-89)

## City Manager Report to the Council

February 24, 2015

### Business:

- The City has received final sales tax numbers for the period December 16, 2014 through January 15, 2015. The final sales tax number to be received from the Oklahoma Tax Commission is \$1.275M. The budgeted number for this period is \$1.228M or \$47K over budget. Year to date sales tax revenue is \$9.332M compared to a budgeted amount of \$9.315M or \$17K over budget for the year. The City budgeted an increase in sales tax revenue for the fiscal year and fiscal year-to-date the City has collected \$428K over the previous year.
- Water sales, district water sales, sewer and garbage sales for the month of January 2015 equaled \$679K. The budgeted sales for November is \$696K or \$17K under budget for the month. These numbers have been seasonally adjusted. Year to date sales are \$4.915M compared to a budgeted amount of \$5.276M or \$361K under budget for the year.
- The City Council approved appropriating funds for a Natural Gas Powered Generator to run the E-911 Center in the event of a power outage. Staff has developed a bid package for the generator and ads will be run in the McAlester News Capital on February 22, 2015 and March 1, 2015. The bid opening is scheduled for Thursday, March 12, 2015.
- The City has been discussing the road condition of highway 69 and the adjoining frontage roads. Anthony Echelle, ODOT District Engineer has informed us that a maintenance contract will go out for bid in March 2015. The scope of the project will repair the most distressed sections of the highway from Comanche to the OHP office. The work will also include a thin overlay of the frontage roads from Comanche to Peaceable. The repair work will occur this summer.
- Staff is in the process of developing a Request for Proposals (RFP) for a Comprehensive Plan update. We anticipate the RFP to be completed by the end of February and put out for review by Planning and Zoning the first two weeks of March 2015. Upon review and comments the RFP will be advertised for bid to qualified organizations.

- The night of February 16, 2015 our e-911 Dispatchers smelled smoke in City Hall. Officer Kevin Bishop and Officer Matt Miller searched City Hall for the source of the smoke but were unable to locate anything. Firefighters Larry Edwards and Frankie Radosevich teamed up outside and discovered that the smoke was coming from the Cantreras Law Office on the corner of Carl Albert and 1<sup>st</sup>. Street. The fire was in the back break room at the electrical panel. Because of the swift action the fire was contained to the break room and the building sustained minimal damage.

**Community & Economic Development Department:**

- Report Not Available
  - Building Permit Report
  - Code Violation Report
- The Spectrum Group of Alexandria VA. will be arriving in McAlester on February 25, 2015. They will be touring McAPP in the morning and Choctaw Defense after lunch. Following their tours the review committee made up of 8 persons representing the City of McAlester, McAPP, MDSA, and FMA will interview Spectrum for the consultant for the defense sector strategic plan.

**Economic Development Department:**

- Report Not Available

**Public Works Department:**

- Report Attached, Exhibit "C"
  - Traffic Control
  - Facility Maintenance
- Carstenson's, the contractor for "A" Street and 6<sup>th</sup>. Street, CIP #2 is progressing very well. All water and sewer lines have been replaced on "A" Street and the crew will be moving to 6<sup>th</sup>. Street this week. Carstenson's has a separate road crew who will remain on "A" Street to complete the roadway. It is anticipated that the sewer and water line replacement on 6<sup>th</sup>. Street will be completed about the same time that the road crew completes "A" Street.
- CIP #4 is getting close to final design. A public meeting is scheduled for Thursday, February 19, 2015 at 5:30pm to inform the public of the upcoming construction project. This project is on South Street in front of Will Rogers Elementary School and Puterbaugh Middle School. The plans are currently at 90% complete and it is anticipated that this project will begin the day school is let out in May.

- CIP # 1 continues to move along under the direction of the Public Works Department. The City has hired Mark Proctor to pour concrete and finish the curb, gutters street tie-ins on the east and west side of 17<sup>th</sup>. Street. City crews are setting the base and constructing the concrete forms in preparation for Mr. Proctor. Mr. Proctor will pour the west side first and then proceed to the east side of the street. He is pouring each side at one time.

**Community Services Department:**

# City Manager Report

## Traffic Control 1/1/15 1/31/15

- \* Office working on paper work , Manager Report , Payroll , Attendance Calendar.
- \* Took paper work to city barn.
- \* Took barrels to 1424 East Osage (utm) called.
- \* Traffic Control for Parks Dept. on Carl Albert , So they could take down X-Mas lights that are on the light poles.(The hanging ones).
- \* Tommy called , Needs alley way closed off , Between 5<sup>th</sup> street / 3<sup>rd</sup> street . Behind car wash.
- \* Robbie with Parks Dept. called , Needs North Main closed , So they can pull down X-Mas lights down. (Going into North Town).
- \* R/R Stop sign at G street & Polk street. (Put up new base , pole , Stop Sign).
- \* R/R Stop sign at Washington & Main. (Put up new Base , Pole , Stop Sign).
- \* Went to pick up TC-6 at city barn. (They had to work on break lights).
- \* Picked up all barrels on 1<sup>st</sup> Street & Morris (UTM)
- \* Had to run back by city barn, To let them adjust breaks.
- \* Went by 1424 East Osage and picked up barrels.
- \* Set out signs on Carl Albert (MEN WORKING AHEAD) for Parks Dept. to remove the X-Mas light from Carl Albert Parkway.
- \* Checking all other work zones, Barrels and Taped off.
- \* Reworked barrels on North South street ( by Denny's).
- \* Traffic Control (TC-2 , TC-6 ) On North Main so Parks Dept. could take down the X-Mas light down that are across Main Street.
- \* Had to close off West Coal Street for UTM , Water line repair.
- \* Ran by Traffic Control Shop for more barrels.
- \* Picked up some barrels at West & Madison.
- \* Cleaned out TC-6 & Swept garage stall at Traffic Control Shop out.
- \* Picked up all barrels off West Carl Albert.
- \* Traffic Control for UTM clean up on 14<sup>th</sup> Street & Miami , Picked up 3 barrels and left 3 barrels in area & taped it off.
- \* Back to Carl Albert for Traffic Control for Parks Dept. So they can take down x-mas lights.
- \* Office , Paper work , Payroll , Manager Report.
- \* Traffic Control at City Hall to take down x-mas lights , Then back to Carl Albert.
- \* Went to check on all work zones.
- \* Traffic Control at Bst & Seneca (utm) called street iced over , waiting on a salt truck.
- \* Traffic Control at Bst & Kiowa st (utm) Has the pump truck in the street pumping the sewer lines.
- \* Picked up all barrels in alley way at 5<sup>th</sup> street , between 5<sup>th</sup> & 3<sup>rd</sup> street.
- \* Meet with Parks Dept. about Main st & Cherokee st , Pulling down street sign filling down.
- \* Replaced barrel on Electric Street (On man hole) Car / truck hit it.

- \* Working with UTM at 740 West Adams- UTM is putting in 3 sections of sewer line in.
- \* Picked up barrels at 1300 S13th Street.
- \* Blacked 2<sup>nd</sup> Street from Ottawa to Osage. They are pitting in new gas lines, Under the street.
- \* Started paint machiner at TC shop
- \* Went to 1100 Sensca & Bst an dropped barrels off.
- \* Took barrels to 1100 Preakness (UTM) Installing fire plug.
- \* Traffic Control on Carl Albert for parks Dept. (x-mas light).
- \* Picked up barrels on 2<sup>nd</sup> Street, between Osage & Ottawa.
- \* Took barrels to 15 th Street (UTM) water line break.
- \* Office working on paper work , Managers Report , Payroll , Daily work sheet.
- \* Went to City Barn to pick up checks.
- \* Back to alley off Dst (one I was called out to last night). Check up on it.
- \* Going to meet with Doug at 2<sup>nd</sup> Street & Osage about some barrels.
- \* Setting at Main & Cherokee with street light , Its about to full over. Keeping traffic away from it. We need to take it down. Called Delane to came over an look at it.
- \* Back to Carl Albert to Traffic Control for the Parks Dept. to take down more Christams light.
- \* Office , Paper work , City Manager Report , Payroll.
- \* Cheching work zones.
- \* Called to Est & Adams (alley) Sewer line replacement (UTM).
- \* Set up work zone for UTM at Industrial & College dr. Water line break.
- \* Traffic Control at Industrial & College.
- \* Went back to Est & Adams (alley) to help utm with laying big section of pipe.
- \* Had to close alleyway behind 1<sup>st</sup> Nal Bank, Water break in alleyway.
- \* Picked up barrels on South 15<sup>th</sup> Street & Seminole. Left 3 on gravel.
- \* Picked up barrels on West Seminole & Bst . left 3 on gravel.
- \* Called to Bst & Osage for barrels for UTM.
- \* Jeremy call about the C.I.P. project on Ast Trucks going up / down Bst, Called John's office about it , An called Timmy Adams.
- \* Traffic Control on Bst for UTM.
- \* Picked up barrels at Est & Adams (alleyway). An picked up barrels at West Seneca & Bst , Picked up barrels at Ast & Seminole too.
- \* Got barrels at Seminole & South 15<sup>th</sup> street.
- \* Called for barrels at Exxon station for new water meter from UTM.
- \* Took barrels to 2504 Mallard for water main break .
- \* Back to Exxon to Traffic Control for utm on service road.They had to removed old meter can.
- \* Office working on Manager Report , Payroll.
- \* Made a run in town checking work zones.
- \* Had to replace barrel on Electric someone keeps hitting it.
- \* Went to Jefferson School to look at Traffic , They are ok , People needs to slow down.
- \* Went to City Barn to see Timmy Adams about man hole on Electric. Made the 2 line into a 1 line , Until its fixed.
- \* Called to Comanche & 6<sup>th</sup> Street to pick up some barrels.
- \* Paper work in office.

- \* 1<sup>st</sup> Nal Bank—Closed alley water line needs repaired.
- \* Going to check all work zones.
- \* Picked up barrels on Mallard, Left two barrels there on site.
- \* Had to change barrel on manhole on Electric Street, Someone keeps running it over.
- \* Dropped barrels at Keller & Green Meadows for UTM.
- \* Office working on paper work, Manager Report , Payroll.
- \* Reworking barrels at Steven Taylor Ind. Park , College Drive , Picked up 5 barrels , Left 4 barrels , Back to checking work zones.
- \* Replaced barrels on Electric Ave. again, Someone hit it again.
- \* Took more barrels ton Steven Taylor Ind. Park. Made 2<sup>nd</sup> hole.
- \* Set up truck detour on Carl Albert, For Ast .
- \* Checking on work zones.
- \* Putting out anther barrel on Electric, (4<sup>th</sup> one). Putting out stand up cones on Electric, Take down to one lane, In the East line where the manhole is bad.
- \* Picked up barrels in front of gas station at Comanche & 69 Highway.
- \* Took barrels to Dave & Oklahoma for utm.
- \* Went back to work on work zones at Keller & Green Meadows.
- \* Picked up cones at Miller Handly Stop off Main. There are some still there.
- \* Picked up cones at Dave & Garden.
- \* Got barrels picked up at 9<sup>th</sup> & Oklahoma.
- \* Took cones to Elm & Comanche for utm.
- \* Back to Electric (someone hit the barrels again.
- \* Kim from office called, Stop sign down at Main & Washington. Got it back up.
- \* Kim called , Sign down at the 600 block of Carl Albert, got it back up.
- \* Going to check all work zones
- \* Repaired intersection sidn at Fst & Carl Albert.
- \* Re-Worked area of Ansley & Katy (Barrels knocked in to ditch).
- \* Picked up checks at City Barn.
- \* 1<sup>st</sup> & Morris water break.
- \* Going to put up new sign at Main & South for the intersection, Marking turn lane.
- \* Traffic Control for Pump Truck on West Monroe.
- \* Traffic Control for Tree removal on East Carl Albert, Blocked inside lane. ( both direedtions)
- \* Went out to highway 69 to pick up barrels from yesterday.
- \* Working on Manager report , Payroll
- \* Helped Traffic Control on Bst & Delware with Pump Truck.
- \* Made new signs for Parks Dept. For the parks-Toddler Only (2) , Ago 5 to 12 (4) , Handly Cap Only (2). And helped put them up , With No Smoking sign and pole with bases.
- \* Repaired stop sign at Coal & Ash.
- \* Took barrels to 2504 Mallard for concrete pour.
- \* Made stickers for Glen at City Barn.
- \* Picked up barrels at Green Meadows & Keller (water tap).
- \* Took barrels to North Dst for UTM.
- \* Took barrels to alley way at Est & Adams for UTM.
- \* Blocked North Dst for UTM (TC)

- \* Traffic Control for utm on South Main (water break)
- \* 69 & Comanche Traffic Control- Working on Traffic Lights.
- \* Picked up cones at Keller & Willow Run.
- \* Went to City Hall to turn in paper work.
- \* Kim called about signs on Sunny Brooks, Headed over there to look for it.
- \* At office making new street signs for Sunny Brook & Ten Springs. Someone took them.
- \* Put up new street sign up at Ten Springs & Sunny Brooks.

Jake Walton  
Project Manager  
Severn Trent Services  
5200 Water Works Rd  
McAlester, OK 74501

Dear John:

Attached is the monthly report for January 2015.

The final pieces for the JH-100 trial have arrived and are being installed. We expect to start the trial the first week of February.

We have experienced several turbidity violations during the month. This will likely result in a public notice. We are looking into the cause and what we can do to correct this. Part of the issue is the colder water. The Alum historically does not do well in colder water. The JH-100 should perform better than the Alum. Another piece of the puzzle is the filters. We have one filter (Filter #3) out of service. The turbidities have been out of range for several weeks now. We have tried chemical cleaning several times but have not seen the turbidity values drop. The other filters have issues as well. The filter programming is causing the filters to not run smoothly. This makes the turbidities jump and runtimes to be decreased. We will be putting together a corrective plan of action for this in February.

Sincerely,

Jake Walton  
Project Manager

---

## Executive Summary

In light of the recent turbidity issues, things are progressing well at the treatment plant. The JH-100 trial is scheduled to begin in February. Other improvements to the coagulation process are in the works as well. The phosphate feed system is in the hands of Tetra Tech and we hope to hear back from them soon as this project requires a PE stamp of approval for DEQ permitting.

We will also be implementing a maintenance tracking system in February. Carlos from our Tech Services division will be onsite to initiate the system and train employees. This will be great for preventative maintenance and providing a tracking system for all maintenance and repair activities.

## Critical Issues

The sludge system continues to be worked on. We are installing a new polymer feed pump as the old one is not doing the job.

The filters continue to cause issues with their PLC operations and mechanical issues. We are working on a corrective plan of action to present to the City for repairs. Filter #5 is in the first phase of development for rebuild.

The MCC for the High Service Pumps continues to age and give problems occasionally. This should be looked at for replacement in the next year or two.

## Environmental Compliance

We have had several turbidity violations that will likely result in a public notice. We are working diligently to provide a solution to the operational and mechanical errors that have occurred.

## Other Performance Measures

Chemicals used for the month of January are as follows:

- Alum 112,515lbs
- Caustic 47,174lbs
- Polymer 620lbs
- Carbon 4,000lbs
- Chlorine 4,264lbs
- Permanganate OFF

---

## Contract Performance Metrics

Steady progress is being made to the CIP. The next big push is to get the filters rehabbed. Some of the smaller SCADA work is being done as well.

## Financial Issues

Attached are copies of the two Maintenance Caps. We have spent 70% of the Maintenance Cap to date. We can move funds from the Chemical Cap, since we will likely stay under on it. A Memorandum of Understanding needs to be made stating the amount of money desired to be moved from the Chemical Cap to the Maintenance Cap.

## Safety Performance

No safety concerns to report. All staff have been active in the STES safety program and safety meetings.

## Security

There have been several people riding through the property on four wheelers. I believe they are hunting on the Corps land on the other side of the Treatment Plant. No attempt has been made to confront them. Staff has been instructed to call the police when they are seen.

## Personnel

We are still searching for another operator. Several staff members are attending training sessions and advancing their certifications.

## Appendix Items

- MOR
- DMR
- Maintenance Cap
- Chemical Cap

**January 2015/ February 2015 Tourism Report**  
Kathy Wall

**Projects:**

**Status:**

**PBR**

I will start working with the PBR Committee planning for the 2015 PBR Event. The Chamber is not sure if they want the PBR this year for a fund raiser. I am waiting to hear their decision.

**BASS Masters**

This will be a state wide project involving several communities. Since Lake Eufaula is the largest body of water in the state, Bass Masters is working on putting it as a stop on the Bass Masters Trail to Fish Oklahoma. I am waiting to hear back from B.A.S.S. for a scheduled phone conference on February 26th.

**Hotels**

I've visited, emailed and called our hotels, also restocking brochures. Meeting managers/ owners upon request.

**Choctaw Nation**

Working with Choctaw Nation Tourism Director Lana Sleeper. We were working on two bus tours from Durant to McAlester. They are now working on an alternative plan.

**Junk Hippy Road Show**

I am helping promote this event set for **February 21<sup>st</sup>, 2015.**

## City Brochures/ Travel OK

Distributing to several Travel Plazas, Travel OK, and hotels  
Keeping brochures restocked and mailing upon request. Report from Travel.ok listed below.

Analysis of the data shows that for the billing period (1/1/15 – 1/31/15), we sent a total of 1,132 of your McAlester brochures to people in 41 states. The most frequently requested partner received 3,111 requests, and the least active partner that participated all month received 398 requests.

Further analysis of the data shows:

- **Top States:** Oklahoma and Texas were your #1 and #2 requestors. Oklahoma & Texas ranked first and second for all 64 partners this month.
- **Number Three States:** Missouri and Kansas tied as your #3 requestor. Missouri or Kansas was the top three requestor for 91% of the Fulfillment Program partners this month. Other states listed as #3 requestors were: North Carolina (2) and Arkansas (1). Three partners had multi-state ties as their third requestor.
- **Surrounding State Activity:** The surrounding states had the following activity: Arkansas was a top three requestor this month for one partner. Kansas was a top three requestor for twenty-six partners, with Missouri being a top three requestor for thirty-two partners. Texas ranked as the second requestor for all of the Fulfillment Program partners this month.
- **In-state/Out-of-state Mix:** About 59% of your orders came from Oklahoma. The average partner received 57% of their orders from in-state, so you were above average on your in-state requests.
- **Average Orders:** There were 64 brochures active during the month on the web site order form.
- **Ranked:** McAlester is ranked fourth in the state of Oklahoma for requested city tourism information, out of 21 cities. Oklahoma City ranked 1<sup>st</sup>, Tulsa ranked 2<sup>nd</sup>, Norman ranked 3<sup>rd</sup>, McAlester ranked 4<sup>th</sup>.
- I am e-mailing each person who requested information on McAlester, helping set up visits, tours, vacations, etc.

## Cross Promoting (Kiowa)

Oklahoma Tourism has launched a new tourist route for Oklahoma. This route is called Rhythm and Routes Oklahoma Music Trail. On this trail is the city of Kiowa and McAlester. We will be promoting the birth place of Reba McEntire.

### **FLW Fishing Tournament**

This is a Wal-Mart fishing tournament. I am getting creative on keeping the anglers here, other than when they are on the water.

Example: Weigh-in, at our Wal-Mart Parking Lot.

Entry: Must have a receipt from a City of McAlester hotel to enter.

I've met with Kenny Beal and Cody Knight to help with this tournament.

### **Okie Nation**

I am working with Eric Wooley to help promote, get vendors and sponsors for his Hunting & Fishing Expo set for March 6-7-8<sup>th</sup> at the SE Expo.

### **Discover The Ice Age**

I am in negotiations at this time, trying to get this new hand on exhibit to McAlester.

### **Amish Festival**

I am waiting to hear back from him at this time. I've not heard back from them at this time.

### **McAlester Home & Ranch Show**

I have been working with Janelle & Kim Martin. We are already planning next years show.

### **Harlem Ambassadors**

After several months of contacting the Harlem Ambassadors trying to get on their tour, they are coming to McAlester **April 8<sup>th</sup>**. I am working with Will Holliman to help promote. This will be held at McAlester High School Gym.

**Ruffles & Rust**

I contacted the owner of the amazing expo event, and she agreed to come to McAlester May 1-2, 2015. I am also helping promote this event.

**Skate Fest/ Redemption Brigade**

I am working with Aaron Jennings with Redemption Brigade to help promote this event. We are also working on another event for next year at this time called Extreme Sports. Postponed until 2016

**Veteran's Day**

I will be working with several organizations to help coordinate a Veteran's Day Parade for 2015.

**Tobucksy County Courthouse**

I met with Ian Thompson to look at the Tobucksy Court House Wednesday February 11<sup>th</sup> at 10 am. He will email me his recommendations for the restoration of the Court House.

**HOG Rally**

I was contacted by Donna, with the Hog Rally. She wanted to touch base with me to see if McAlester would be interested in hosting a Hog Rally in 2016 or 2017. I' am waiting to hear back from her.

**Lion's Club**

I will be spoke to the Lion's Club on Tourism in January and will be sharing this time with Stephanie Giacomo with MRHC.

### **Leadership Oklahoma**

Ann Owens picked up information about our city and asked if I would supply the guest bags for her group next year. The bags have been ordered.

### **OML Leadership Conference**

I have submitted a host application to Citizens Academy Leadership Training 2015-2016 for August and October. This is two day training for 30-50 people.

### **Oklahoma Highway Patrol:**

Will be coming to McAlester, **March 14, 2015 from 11-2**

They will set up in Wal-Mart parking lot for the citizens to take part in their free safety programs. The children and adults will have an opportunity to have hands on experience with their specialized OHP equipment.

### **SPC Quinton Picone:**

We will help host SPC Quinton Picone's Volunteer Day as well as his Key Ceremony on Saturday, **March 21<sup>st</sup> at 9:00AM at the veterans new home, 2254 Krebs lake Rd. in McAlester, OK.** We are inviting the entire community out and are hoping to have as many people there as possible to help install the landscaping plan of the home!

We will officially be turning over the keys of the home to Quinton at his Key Ceremony on April 11<sup>th</sup> at 11:00AM I am helping facilitate this event. I have all of the food donated.

## **Oklahoma Free Will Bicyclist Tour June 11/12**

Approximately 500 bicyclists will be coming through McAlester spending one night on their 2015 Tour on June 11<sup>th</sup>. They will camp at Chadick Park and in the boys and girls club. They are escorted by two Highway Patrol officers and travel with two semis, one for showers and one for equipment. They are followed by several family vehicles. A few will stay in hotels. We will be running two buses to taking them to our downtown businesses for dinner, shopping and wine tasting. We will be showing a movie in the park that evening and also providing a band for entertainment. I will have one concession truck set up for drinks and snacks. I am working on a group to provide breakfast at this time.

## **Prison Rodeo**

I've sent an email to Governor Fallin's Council Jennifer Chance asking when our next meeting with DOC will be. I am waiting for her reply. I've also received a call from the Oklahoman. They will be doing a story the third week of February, on how we are trying to get the Prison Rodeo back.

## **Attending:**

- Attended Choctaw Country Meeting / name changed to Choctaw Country.
- Serving on NUC Council and attending all meetings. Due to NUC rules, I've had to resign.
- Choctaw Territory Tourism Board.
- Weekly meetings with Chamber of McAlester, Pride In McAlester, McAlester Main Street.
- Monthly Leadership Meetings.

### **Advertising with:**

- Travel Ok online (Free)
- Social Media (Free)
- Livability Magazine
- Kiamichi Country
- Travel Ok New 2015 Travel Guide
- Lake Eufaula Guide
- McAlester News Capital ad will go out to 17 newspapers throughout the state. This also includes the Oklahoma Geographic (including nature, preserves, zoos/aquariums and outdoors) Museums, Galleries, and Cultural Attractions Charm (boutique businesses, unique Main Street attractions and quaint lodging). Festivals, Events & Rodeos in every corner of the state.  
Areas covered in this book will be: Northwest, Northeast (including Tulsa), Central (Oklahoma City metro area), Southwest, and Southeast Oklahoma.

# SALES TAX RECEIPT SUMMARY - BUDGET ANALYSIS - 02/2015

Analysis A - These numbers are calculating by evenly dividing budgets and multiplying projections. (ie: 9 months divided by 12)

			YTD		% of the year	Projected Year	Budget less	Budget	Projected Annual Difference
			Budget for year	Collections FEB 2015	complete (08/12)	End	Projected	(08/12)	(over budget)
01	General	2 cents	7,901,198	5,326,902	0.6667	7,990,353	(89,155)	5,267,465	(59,436)
26	Educational	0.25cent	987,650	665,863	0.6667	998,794	(11,144)	658,433	(7,429)
30	Economic Development	0.25cent	987,650	665,863	0.6667	998,794	(11,144)	658,433	(7,429)
38	Dedicated Sales Tax	1 cent	3,950,599	2,663,451	0.6667	3,995,176	(44,577)	2,633,733	(29,718)
			13,827,097	9,322,078		13,983,117	(156,020)		(104,013)

Analysis B - These numbers are calculating by using three year average numbers for percentage of year completion on total collections and

			YTD		% of year	Projected Year	Budget less	Budget per 3	Projected Annual Difference
			Budget for year	Collections FEB 2015	collected (3 yr average)	End	Projected	year average	(over budget)

City of McAlester  
Safety Office  
Monthly Report January 2015

Date: 1-28-2015

EQUIPMENT: Just a few items of Personal Protective Equipment purchased this month. I am ordering some Lineman's gloves for Parks and Facility Maintenance.

TRAINING: I have been instructing employees in the use of PPE. We need to make sure that they not only have the equipment, but also the training on how and when to wear it. Most all departments have been turning in their weekly safety meetings. I will keep after the ones that are behind.

ACCIDENT: No accidents this month.

INJURIES: Three injuries this month. One firefighter strained his back lifting a patient and is off for at least two weeks. A policeman strained his back and returned to work the next morning. A Streets employee was injured by a foreign object in his eye. He was treated at Working Well and returned the next day.

DAMAGE: We had 2 damage reports this month. A citizen reported a tire cut after hitting a pothole. I believe OMAG will be denying this claim. Two possible reasons for this denial are, one, he told us three different areas of Wade Watts where this occurred, and two, we had no prior knowledge before he hit the pothole. The second damage occurred at the Airport. Approximately 150 feet of fence was torn down near the Dolese Plant. The manager of Dolese decided he would pay for it after he found out it was being reported to the Police.

INSPECTIONS: I have completed several site inspections this month and most all employees have been wearing the required PPE and working safely. We had the one instance of an employee not wearing PPE and he was injured.

WORKERS COMPENSATION: No new claims this month.

I have begun a monthly newsletter at the request of my Supervisor. This newsletter will contain some safety tips, some tips on health and wellness along with a few other "fun" items. They will be posted at each facility.

Doug Basinger  
Safety/ Risk Management

**McAlester Police Department****Monthly Report****January, 2015**

The following information is provided concerning statistics from the McAlester Police Department for January, 2015; a comparison to January, 2014 is provided:

	<b><u>Activity</u></b>

Chief of Police

## McAlester Police Department

2014

The following information and statistics are from the 2014 calendar year:

The McAlester Police Department ended 2014 with **41** police officers, **1** animal control officer and **2** secretarial staff.

Some facts about our officers are as follows:

Average age: **42**

Years of Service (total): **572**

Average per Officer: **14**

Hours of Training (total): **55270**

Average per Officer: **1348**

College degrees held (Associate/Bachelor's/ Masters): **25**

In 2014 the MPD purchased the following through Capital Outlay:

Six (**6**) fully equipped SUV patrol units

Total cost: **\$211,326**

One (**1**) Detective unit equipped with undercover emergency equipment

Total cost: **\$22,880**

During 2014 MPD, with the assistance of the city grant writer, applied for and received **\$443,384** in government grants. The individual grants and amounts are as follows:

Oklahoma Highway Safety Office:

**\$27,994**

(For traffic safety/enforcement)

Department of Justice (COPS):

**\$405,660**

(For hiring 3 police officers)

District Attorney's Council: \$9,730

(For purchase of body cams)

**MPD**

**2013/2014**

**Comparison**

	<b>2013</b>	<b>2014</b>	<b>%+/-</b>
<u>Offense reports/Investigations:</u>	<b>2524</b>	<b>2,729</b>	<b>+08%</b>
Reported crimes:	<b>3940</b>	<b>4,199</b>	<b>+07%</b>
<u>Prisoners booked into jail:</u>	<b>1408</b>	<b>2,116</b>	<b>+57%</b>

**Crimes of note**

	<b>2013</b>	<b>2014</b>	<b>%+/-</b>
Assault	313	334	+07
Burglary	417	445	+07

---------------------------------	------------	------------	-------------

<u>Citations issued:</u>	<b>9430</b>	<b>11,244</b>	<b>+19%</b>
--------------------------	-------------	---------------	-------------

<u>Miles patrolled by MPD:</u>	<b>525,221</b>
--------------------------------	----------------

(154 miles of streets in McAlester)

### **Community Services Officer**

#### **CSO**

**Outreach into the community** – MPD is very effective in the basic law enforcement duties (response to citizens, criminal investigations, traffic enforcement, etc...).

The **CSO** program allows us to be more **progressive** and **proactive** and in the process build **trust** between the **public** and the **MPD**.

**Community Services Officer** is involved in the following programs:

#### **Neighborhood Watch – McAlester Safe Neighborhoods**

Assist in the implementation and maintenance of neighborhood programs

#### **Fraud Education**

Elder fraud

Home Improvement

Identity Theft

#### **Multi-Unit Crime Free Housing**

Assess and recommend improvement in housing

Instructing landlords/managers in proper management of tenants

**T.E.A.M. Training** – T.E.A.M. stands for Teaching, Educating and Mentoring, it is built to address problems that traditional DARE programs didn't address. This program is being conducted in partnership with the McAlester Public Schools as well as the Choctaw Nation. Some of the topics will include:

Bullying and harassment

Gun Safety

Drugs

Fire Safety

Social Media

Using 911

School Security Issues

Dating Violence

#### **Representing MPD at various events**

Parades

Community Events

Sporting Events

## **2015**

### **Goals and Objectives**

In 2015 the McAlester Police Department has the following goals and objectives:

Maintain the current progress in the Community Services Officer program. We plan to reach into multiple schools and other youth organizations in order to educate area youth concerning various topics. We will also reach out to realtors and landlords, offering our assistance in the "Crime Free Housing" program.

Officers should be equipped with body cameras in 2015. Bids have been opened and funding has been identified for the purchase of this technology. We feel this is an area departments nationwide will be addressing in the near future and our move in this direction will be viewed in a positive light.

Officers are scheduled to be furnished new side arms which have been recently ordered. These pistols will replace earlier models, most of which are now 13 years old.

We are in the process of hiring three (3) new officers through the U.S. Department of Justice COPS program. This program will pay the salaries and benefits of these officers for the next three (3) years. We are going to use these officers to address the drug problem existing in our area and the drugs that travel through our city.

MPD officers will continue working traffic enforcement in hopes of reducing traffic accidents and resulting injuries. We will utilize the Oklahoma Department of Highway Safety grant in this endeavor. Officers are now being trained in the use of "ticket writers" to help enhance our effectiveness.

Respectfully Submitted,

Gary Wansick

Chief of Police
