

Brush Chipping

The Town is pleased to offer brush chipping for in-town property owners only. The regulations following have been placed on this service to ensure efficiency in cost and labor.

- The Town will chip one truck load of brush per property per year; additional loads may be chipped for a fee and must be pre-approved.
- No brush will be chipped by the Town in which an individual or licensed contractor has been hired. It is the contracted person's and/or property owner's responsibility to dispose of the brush.
- Brush must be placed adjacent to the street with all branches stacked in the same direction and must not impede vehicle traffic on street or pedestrian traffic on sidewalks. Do not place brush on water meters, sewer cleanouts, at fire hydrants or guide wires.
- Large limbs must be no larger than a 6" diameter around and cut so that one person can load them. No trees, stumps or lumber will be picked up.
- No brush will be chipped that has been hauled in from out-of-town properties.
- The chipper will not be loaned or rented out for personal use; any brush that satisfies the above regulations will be addressed by the Town.

Please contact the Town Office if you have brush to be chipped; you will be added to the pickup schedule. Every effort will be made to accommodate residents in a timely manner, but inclement weather or other scheduled jobs could delay chipping.
